

CM STRENGTH
POWERLIFTING PROGRAM

SQUAT | BENCH | DEADLIFT

HDEX

TOTAL WAR

A CM STRENGTH POWERLIFTING PROGRAM
BUILD THE TOTAL. SURVIVE THE LOAD.

WHAT IS POWERBUILDING?

Powerbuilding simply means combining some aspects of powerlifting and bodybuilding together. Generally, this will mean:

- Using the big 3 lifts as the foundation of the program – squat, bench, deadlift
- Max effort work – Incorporating specific heavy lower rep range targets more common to powerlifting
- Dynamic effort work – Incorporating some medium weight dynamic speed work that powerlifters use for rate of force development
- Using isolation work that is more common for bodybuilders
- Using more of a variety of movements in order to achieve p common for both

avoid injury. Follow the technique notes carefully to ensure you have the know how to accomplish this. You will also see where

- Incorporating medium to high rep pump work more specific to bodybuilding

Combine all this intelligently, and you get powerbuilding.

MAX EFFORT WORK

Part of our program will consist of max effort work. If you have not done this before, you are in for a treat. Max effort work generally means you are going to work up to 90% of your 1 rep max for 1 repetition. After this you are going to attempt a 100% rep. In other words, do the best you can do. The goal being a PR. We have a little different view on this through our experiences. We will not be doing heavy singles weekly. It is not necessary. We will do some lower rep sets however, that will be very heavy.

It will become extremely important that you use perfect form to

avoid injury. Follow the technique notes carefully to ensure you have the know how to accomplish this. You will also see where

we advise you to simply hold a weight for a few seconds before starting a set, and then holding it again for a few seconds before racking the weights.

You will be warming up well, and our pre-max bodybuilding exercises will also serve to protect you as you go all out.

We will use some rotation on this exercise(s) to ensure:

- Weak areas are addressed
- You avoid accommodation (your body's nervous and muscular system adapting to the same exercises over and over)
- Longevity as keeping the same exercises with no rotation often results in injury

The max effort method ensures maximal motor unit recruitment as well, but more on that later.

Building maximal strength goes a long way in many different aspects. The obvious thing is that you will get physically stronger. You can push more weight, drag more weight, etc. If you can move more weight, you will generally develop more muscle fiber size through increasing levels of mechanical tension. Bigger muscles (larger muscle fibers) can potentially produce more force. Bottom line, more strength can create more muscle. It's a win-win. You will see this especially in the beginner to intermediate phases of training. It will get tougher as you enter the advanced stages of training, which could be 10 years or more into training. Unfortunately, you can't get infinitely stronger.

DYNAMIC WORK

Part of our program will also consist of dynamic work. With this method, you will be using much lighter weight, probably closer to 55-75% of your 1 rep max. By itself, it will not make you big, but carefully woven into your program, it will make you explosive.

This method is specifically to improve your rate of force development. In other words, produce force, a lot of it, and fast. This is particularly useful for athletes. The best athletes are explosive and can produce force very quickly. We want you to be explosive, so you can push more weight. This is also useful for conditioning. You will be doing a phase where the volume of your dynamic work ramps up in order to accomplish this. This type of work is also, well, fun! It is enjoyable blasting the weight up explosively.

For your dynamic work you will be using a percentage of your 1 rep maximum.

CALCULATING YOUR 1 REP MAXIMUM

Rep Max Calculator - All Things Gym

Use any standard rep-max calculator to estimate your 1 rep maximum. The goal is to get a practical training number, not to force a true max attempt. You can enter a 3RM or 5RM and use the lowest estimated 1RM from the formulas shown.

even 5 rep max to get your number.

Let's take a look.

Below I entered 400 for 3 reps. Go down to the 3RM and you will see this. Across the top you see all the different formulas and their calculation for the 1 rep max. We want you to use the lowest number. In this case it would be

Enter Weight & Reps to get RM Predictions.

I did for reps.

RM	Average	Lombardi	Brzycki	Epley	Mayhew	O'Conner	Wathan	Lander
1RM	437	446	423	440	455	430	435	428
2RM	411	416	411	412	409	409	414	411
3RM	400	400	400	400	400	400	400	400
4RM	388	388	388	388	391	390	386	388
5RM	378	380	376	377	383	382	373	377
6RM	368	373	364	366	375	373	362	365
7RM	359	367	352	356	368	365	351	354
8RM	350	362	341	347	361	358	341	342
9RM	341	358	329	338	354	351	332	331
10RM	333	354	317	330	348	344	323	319

the Brzycki result which says a 423 max. Is this the most accurate? Maybe, maybe not. We simply want to be conservative here as we went extremely aggressive in our progressions through the program as you will soon see.

BODYBUILDING METHOD

We will also be using traditional bodybuilding methods. Typically, this consists of 75-85% of your 1 rep max loads done to failure or close to it. Many times, we also finish an exercise with a high intensity technique that actually takes you beyond failure. This work is very demanding and will require you to have hyper focus on recovery so that you don't overtrain.

LOG BOOKING AND PROGRESSIONS

This program is going to lay out some very aggressive progressions for you week to week. **The progressions will always be in bold type.**

This is an example. In week 2 you add 2 more reps to your working sets than you did in week 1 using the same weight.

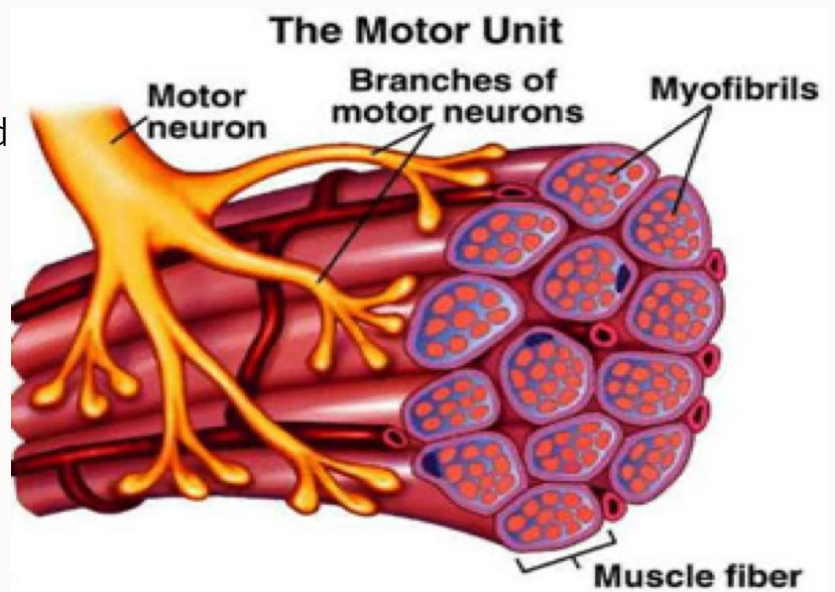

Leg press – Use a narrow stance with your feet in the middle of the platform. This is going to hit your quads hard. **Do a few warm up sets then 2 tough sets of 12 using the same weight you did last week for 10.** Use the same weight as last week but try to get 2 additional reps. **2 total work sets**

Full transparency here. We do not expect you to hit *every single* progression. What we do expect, is for you to give it your all. Give every single bit of effort you can muster. That is what we expected from each other, and what we expect from you. We held ourselves to a high standard, and this also applies to you. Even if you hit only 25% of these, you will come a long way by the end.

Knowing this, be sure to use a log book. Old school pen and paper is fine. You don't have to use a fancy spreadsheet unless that is your preference.

PUTTING IT ALL TOGETHER – THE SCIENCE

Let's look at motor unit recruitment. Motor units are part of your nervous system and the muscle fibers they talk to. The motor neurons (as seen in the diagram) tell your muscles fibers to produce force.

We have what we call high threshold motor units (HTMUs) and low threshold motor units (LTMUs). The HTMUs have larger nerve cells that control hundreds of muscle fibers. This means that they produce much more force than a LTMU. This is because the LTMUs contain a small nerve cell that drives less muscle fibers.

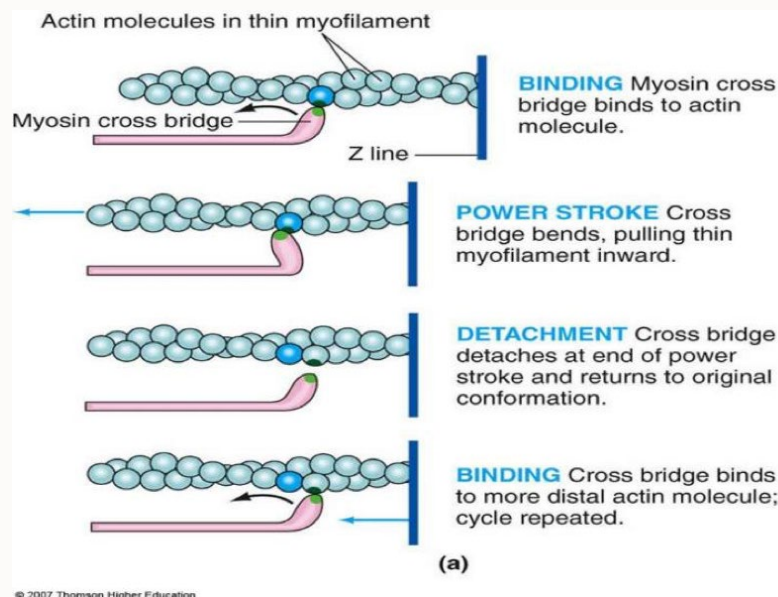

It is also key to understand the "Heneman Size Principle". This states that motor units are recruited from smallest to largest. When you use lighter weights, your body will call upon the LTMUs first. It is not until the body needs to produce high levels of force that the HTMUs are called into action. This is key. You want maximal activation. This simply means you want every possible muscle fiber to fire and produce force.

When you use the max effort method you are using loads that are so heavy, your body has to produce as much force as it can. This means full engagement of LTMUs and HTMUs. This is a good thing.

What about the dynamic effort work? It is lighter so you might have thought to yourself this will not require full activation. You were kind of correct. The key is how explosive you train. In other words, how much effort do you put into driving the bar up. You also engage HTMUs when you need to produce maximum force fast. If you push the bar up as fast as you can, you also have maximal

activation. The same is even true with a vertical leap. If you jump as high as you can, with max effort, you do get maximum motor unit activation.

So, your next question might be, then why don't we just lift light weights fast? Well unfortunately it is not that easy. Muscle growth itself, requires mechanical tension. This happens when smaller filaments of muscle called actin and myosin overlap, and a process called cross-bridging occurs. This process enables muscle fibers to sort of "lock in" and produce force. When they stay connected, the result is mechanical tension. This results in the potential for muscle growth. If you think about the max effort work, you can really understand this more clearly. You are fighting against the heavy weight, grinding to get it up. During this, your actin and myosin filaments are overlapped, and your body is producing maximum force and tension.

Let's go back to your original question on light weights. The cross-bridge process mentioned works, but the fast velocity of the bar moving up and down causes the "attachments" to detach often. They do not stay connected throughout the whole set. This means you do not reach high levels of mechanical tension and

therefore do not grow. That is why you can't just jump up and down and get huge quads.

Again, the dynamic work does teach you to be explosive and powerful though, so the method will help you become your best.

The bodybuilding method (medium repetition ranges) also covers this well. The loads are close to what is needed to achieve maximum muscle fiber recruitment, but not all the way. When you perform a set to failure, or especially beyond failure, you are covered though. Here is why. You may not engage all the HTMUs from the start, but as muscle fibers fatigue, more are called into play to help you perform additional reps. The closer you get to failure, the more you are calling in all the reserve fibers that may not have been engaged from the start. This is why research from well respected researchers like Brad Schoenfeld is showing that lighter weight and higher reps can create just as much hypertrophy as traditional bodybuilding reps. Failure, or close to it, is key.

Reality and our experience

Let's talk about the application of this a little more. The gold nuggets of info are always in the context and application of theory. Lifting at 85-90% of your 1 rep maximum ensures you have very high levels of activation as we just learned. This means more muscle fibers will contract.

There is a caveat here though.

If you like these ranges, and tend to use it exclusively, you are likely headed for trouble. **Brad Schoenfeld's work** showed that 3 sets of 10 and 7 sets of 3 produced similar gains in size. Internet gurus all cheered and declared they would now just stick with sets of 3. The problem was after the study concluded, the 7 sets of 3 group were beaten up and battered.

Those of us who know training saw this coming. It is common sense really. So, the downside is the risk of injury when only focused on lower rep ranges. It is extremely hard on connective tissue and will most certainly cause some injuries down the line, possibly even tears. Training with only these ranges is not conducive to staying in one piece, nor practical. Having said that, these reps can make you stronger though which does have benefits to overall size, thus we will be careful in application.

What about higher reps? Brad also carried out research on higher reps vs traditional reps. **In this case** sets of 8 -12 vs sets of 25 – 35. The results were that muscle gains were once again very similar. Now we have a solution to always staying injury free right? Let's examine further.

To reiterate, lighter loads such as 40-60% mean you will only have so much muscle fiber activation initially. You need to produce less force, so less muscle fibers need to be recruited. You will therefore need to exhaust those muscle fibers to call in others to help as the earlier engaged fibers fatigue.

Here comes the reality check.

When you get into these higher reps, there is usually an accompanying amount of extreme burning and pain. You will need to work through this. You have to get closer to failure in order to achieve full motor unit activation as mentioned earlier. Can you work through the burn and get close to failure, or will the burn stop you in your tracks? Can you do it on all sets if training specifically in this range? How long can you handle that? The other poignant thing to mention is that researchers such as Chris Beardsley are showing that CNS fatigue is likely more due to these higher rep sets to failure, than training with heavier loads and lower reps. In summary, this kind of training if done right is extremely painful and can be draining. There is a reward though. There is nothing like

a skin splitting pump that turns your skin purple and makes your veins stand out like roadmaps.

In summary, the program in our view should contain a heavy dose of traditional bodybuilding reps, but for maximum strength benefit and longevity, the other rep ranges need to be included in a well thought way.

THE SPLIT

Here is what the training split looks like. If you need to add in an extra rest day, feel free. It is very important to recover well from each workout. If you recover well, we prefer you follow this model. The hardest days are days 4 and 5 so having 2 days of rest after is very beneficial.

Day 1	Day 2	Day 3	Day 4	Day 5	Day 6	Day 7
Lower w/ Dynamic	Upper Push w/ Dynamic	Back / Pull	Lower w/ Max Effort	Upper Push w/ Max Effort	OFF	OFF

RECOVERY NUTRITION

With this focus on intensity, and especially the higher volume days on Day 4 and 5, comes the need for hyper focus on recovery to get maximum results. We highly recommend using an amino, electrolyte, and carb drink intra for maximum recovery. This will stimulate insulin response and you will drive more aminos and carbs into muscle and the recovery process is heightened. It also increases blood flow and supports your immune system FYI.

Most males would do well with 6-10 grams of essential aminos, and 40-50 grams of carbs. Titrate the carbs up or down depending on your size. The goal is to greatly reduce soreness. When you do this, all of the right things are happening internally.

Most females would do well with 6 grams of aminos and 20-30 of carbs. Again. titrate up or down depending on size and amount of

RECOVERY NOTE

Use intra-workout nutrition only when it supports the training block. Start with water and electrolytes, then add amino acids or carbohydrates when session length, soreness, or bodyweight goals justify it.

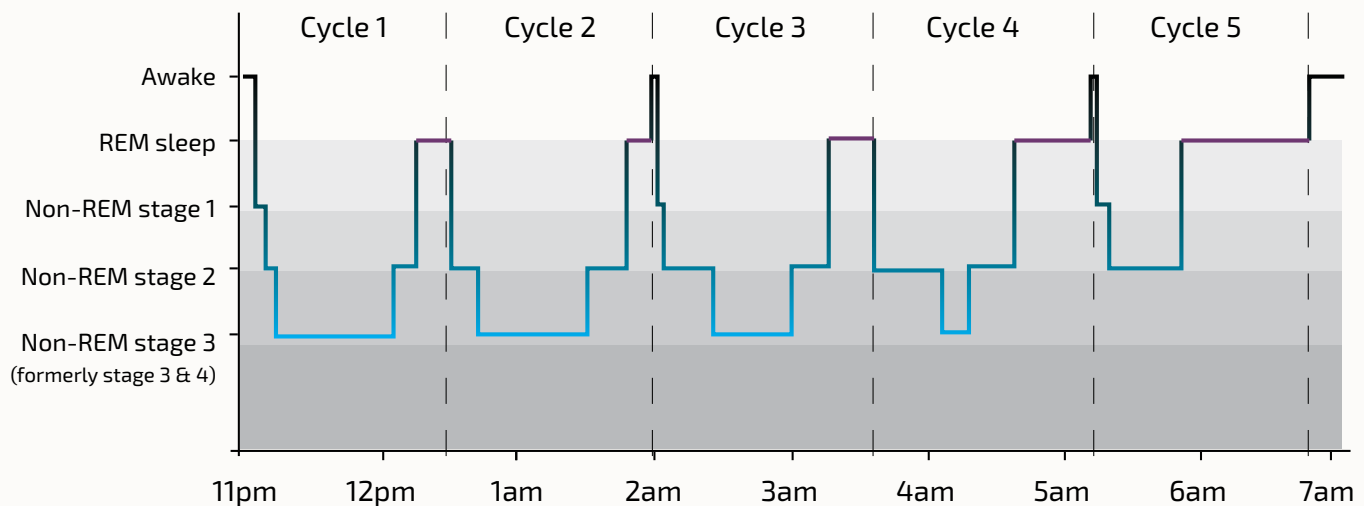

RECOVERY LIFESTYLE

With this focus on intensity make it your mission in life to reduce stress outside of the gym, and to get a full night's sleep every single night. This will greatly enhance recovery as well.

Generally, you want to get 5 full sleep cycles. Every cycle is about 90 minutes. As you can see from the chart below, earlier sleep cycles are heavier in non-REM sleep. Later sleep cycles are heavier in REM sleep (indicated in red).

This is important because of these benefits:

- Non-REM is physically restorative. You release GH, clear waste products, and resupply energy stores just to name a few things
- REM is mentally restorative. Your memory is especially impacted positively

Some tips for better sleep include:

- Turn off all electronics 2 hours before bed, or at a minimum turn off the blue light on your mobile devices 1-2 hours prior
- Make your bedroom as dark as possible
- Make the temperature in your room around 65° (keep it cool)
- Read a book or do something that relaxes you before retiring
- Do not take later afternoon naps, 20-30 minute naps around lunch are ok

BAND WORK

BAND WORK

Band work is sprinkled into the program lightly at various points as well. Recommended band tensions are approximate because resistance changes with setup and stretch length. Use these ranges as a practical guide:

- 2 micro bands, about 13-29 lbs tension, for face pulls and chest press machine setup.
- 2 mini bands, about 5-35 lbs tension, for chest presses and pullovers.
- 1 short mini band, about 25 lbs compact tension, for spidercrawls.

- 1 light band, about 40-80 lbs tension, for assisted chins,
- 1 average band, about 50-120 lbs tension, for assisted chins

NUTRITION

We wrote this program with the intention of it being used to gain size.

If you are looking for a starting point, then try this:

Multiply your bodyweight x 20 for your total calories.

For example, Louie weighs 200 lbs., so this is 4,000 calories daily.

Multiply your bodyweight x 1.25 for daily grams of protein.

The 200 lbs. person thus needs 250 grams of protein daily.

Multiply your bodyweight x .5 for daily grams of fat.

The 200 lbs. person thus needs 100 grams of fat daily.

The rest of your calories should be consumed as carbs.

In this example, the 250 grams equal 1,000 calories (a gram of protein = 4 calories.)

The 100 grams of fat equal 900 calories (a gram of fat = 9 calories.)

4,000 total calories minus the 1,900 calories from protein and fat leaves Louie with 2,100 calories.

2,100 calories / 4 = 525 grams of carbs. * a gram of carbs equals 4 calories.

I'll add another example below for your daily macros.

Our Hero	Bodyweight	Total calories	Protein	Fat	Carbs
Louie	200	4,000	250	100	525
Brittany	125	2,500	156	63	327

PROPER INTENSITY

It is also critical to work at the right level of intensity regarding going to failure. Going too hard or too easy can compromise

Follow the RPE suggestion for each exercise to ensure you are training at the correct intensity level.

RPE CUE

Use this chart to keep effort honest and repeatable. Match the prescribed effort instead of turning every set into a max.

Rate of Perceived Exertion Flow Chart	
Fairly easy like a warm-up weight	@ 6.0
You can do 4-6 more reps	@ 7.0
You can do 2-3 more reps	@ 8.0
You have 2 more reps left in the tank	@ 8.5
You have 1 more rep left in the tank	@ 9.0
Went to failure at perfect form	@ 10
Went to failure with loose form after perfect reps completed	@ 11
Used a high intensity technique to push beyond failure	@ 12
Used multiple high intensity techniques	@ 13

Generally, count sets at 7.0 and above as working sets.

*****FEEDER SETS** – We will mention feeder sets often in the program. They are extremely important. These are low rep sets designed to get you to your working sets carefully, so you do not get injured or exhaust your muscles too soon. Not doing these sets is why many people have been injured executing low volume/high intensity workout plans. These are not official sets as the intensity is extremely low on these.

BLOCK 1 OF 3

WEEK 1

Execute the work. Track the loads. Recover hard.

WEEK 1

Day 1 – Lower body focus

Abs	1 exercise	3 sets
Legs	3 exercises	13 sets (10 of these are dynamic speed sets)
Low back	1 exercise	3 sets
Calves	1 exercise	3 sets
6 exercises		22 sets

Day 2 – Upper body push focus

Chest	2 exercises	11 sets (9 of these are dynamic speed sets)
Shoulders	2 exercises	5 sets
Triceps	2 exercises	7 sets
6 exercises		23 sets

Day 3 – Upper body pull focus

Back	3 exercises	9 sets
Rear delts	1 exercise	3 sets
Biceps	2 exercises	6 sets
6 exercises		18 sets

Day 4 – Lower body focus

Abs	1 exercise	3 sets
Legs	5 exercises	12 sets
Speed pulls	1 exercise	15 sets (these are all dynamic speed sets)
Calves	1 exercise	4 sets
8 exercises		34 sets

Day 5 – Upper body push focus

Chest	4 exercises	10 sets
Shoulders	2 exercises	6 sets
Triceps	2 exercises	7 sets
8 exercises		23 sets

Days 6 & 7 - OFF - Family Days

Day 1 – Lower body focus

Abs	1 exercise	3 sets
Legs	3 exercises	13 sets (10 of these are dynamic speed sets)
Low back	1 exercise	3 sets
Calves	1 exercise	3 sets
6 exercises		22 sets

Warm up rotation

1. Hanging Leg Raises - 6-10 reps
2. Plank – 15 seconds
3. Band Pull Apart with long micro mini band – 15 reps

Do 3 rounds here.

1/ Legs | Lying leg curls

On dynamic squat days we are going to go hard on our leg curls. This will help your hams grow and will have little to no effect on your squat velocity once you get used to them. You will do 3-4 warm up sets and then go right into the high intensity set. It will consist of doing 8 reps, then dropping the weight and doing another 8, followed by 10 slow partials out of the stretch position. **1 total work set**

Rest Period – N/A – only 1 work set

This is an example of what it could look like:

50 x 15 – Warm up set
 70 x 12 – Warm up set
 90 x 6 – Feeder set (low rep sets designed to get you to your top set without exhausting you)
 110 x 8, 90 x 8, 90 x 10 partials – **RPE 13**

2/ Legs | Dynamic squats

Today is dynamic squat day. You are going to use a moderately wide stance. On the leg presses below you will see we use a narrower stance. These two exercises will always be the opposite of each other in set up/stance for overall power and muscular development purposes during this phase. We really focus on speed and producing maximum force as fast as we can here. These squats will feel light. Keep the rest periods to 30 sec. You will be using a percentage of your 1 rep max squat on these. It is tempting to go heavier, but do not do it. These percentages are set for a reason.

This is an example of what it could look like:

135 x 10 – Warm up
 185 x 8 – Warm up
 225 x 4 – Feeder set
 275 for 10 x 2 – This assumes 275 is 55% of your 1 rep max.

Save the heavier squats for later in the week. You will be squatting to a parallel box on these. This can be a bench or box or anything else solid. Do not drop onto the box carelessly. Follow the prescribed setup and execution cues carefully. We will be adding more sets of these during this training block as we go. Do 10 sets of 2 here. 10 total work sets

Work set % – 55%

3/ Legs | Leg press

Use a narrow stance with your feet in the middle of the platform. This is going to hit your quads hard. Do a few warm up sets then 2 tough sets of 10. **2 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

2 plates per side x 6 – Feeder to get feel of movement

3 plates per side x 6 – Feeder set

4 plates per side x 10 – **RPE 8**

4 plates per side x 10 – **RPE 8**

4/ Low back | Barbell hyperextensions

Do these nice and slow. They are brutal. Make sure you are set up on the pad correctly. You should feel this in your low back, hams, and glutes. Do 3 sets of 8. **3 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

Bodyweight x 10 – Warm up

135 x 8 – **RPE 8**

135 x 8 – **RPE 8**

135 x 8 – **RPE 8**

5/ Abs | Decline leg raise

Use controlled form on these. I'd like to see 3 sets of 10 if possible. If this is not possible, just do what you can. If this is too easy, then do 3 sets of 15-20. 3 total work sets

Rest Period – 1 minute between work sets

RPE 8-10

This is an example of what it could look like:

Week 1 – 3 x 10 (30 total reps)

Week 2 – 3 x 11 (33 total reps)

Week 3 – 3 x 12 (36 total reps)

Week 4 – 3 x 13 (39 total reps)

Week 5 – 3 x 14 (42 total reps)

Week 6 – 3 x 15 (45 total reps)

Week 7 – We will rotate out this exercise

6/ Calves | Standing calf raises

Do 3 heavy sets of 8 here. Work the stretch hard at the bottom. **3 total work sets**

In between ALL sets of calves, you will be doing tibialis anterior work. Do sets of 25. See the link below for options on how to do this. This is for every calf workout you do from here on out!

Rest Period – 1 minute between work sets

This is an example of what it could look like:

75 lbs. x 10 – Warm up

125 x 5 – Feeder

175 x 8 – **RPE 9-10**

175 x 8 – **RPE 9-10**

175 x 8 – **RPE 9-10**

Day 2 – Upper body push focus

Chest	2 exercises	11 sets (9 of these are dynamic speed sets)
Shoulders	2 exercises	5 sets
Triceps	2 exercise	7 sets
6 exercises		23 sets

Warm up rotation

1. Hanging Leg Raises – 6-10 reps
2. Plank – 15 seconds
3. Band Pull Apart with long micro mini band – 15 reps

Do 3 rounds here.

1/ Chest | Dynamic benches

Today is dynamic bench day. This means we really focus on speed and producing maximum force as fast as we can. You will be using a percentage of your 1 rep max bench on these. It is tempting to go heavier, but do not do it. These percentages are set for a reason. Use 3 different grips here. Use the prescribed setup notes as well. The first 3 sets are with a grip one finger away from the smooth part of the bar. The next 3 sets are where your pinky will be on the ring. The last 3 sets your forefinger will be on the ring. Do 9 sets of 3 here. 9 total work sets

This is an example of what it could look like:

135 x 10 – Warm up

135 x 10 – Warm up

185 x 4 – Feeder set

225 for 9 x 3 – This assumes 225 is 55% of your 1 rep max.

Rest Period – 30 seconds between work sets

Work set % – 55%

2/ Chest | Slight incline dumbbell press

I love small angles both incline and decline for chest. Just put a 25 under the end of the bench where your head is. If you have a really good adjustable bench, you can do the setting that is a tad higher (more like 15-20 degrees). Do a few warm ups, then low rep feeder sets until you get to your big set. Do about 8 reps there. We'll then do a 2nd all out set there where you try to match the number, and then drop the weight 30% and go to failure. **2 total work sets**

Rest Period – 3 minutes

This is an example of what it could look like:

45's x 15 – Warm up set

65's x 4 – Feeder set

85's x 8 – **RPE 9**

85's x 8. Drop to 60's and go to failure – **RPE 12**

3/ Shoulders | High incline Smith press

You should be pretty warmed up but make sure you still do 1-2 feeder sets to get the feel of the angle and weight. I want a tough set of 8 then 5. Please keep form perfect on these sets. Stop just short of failure. No sloppy form allowed here. Use a medium grip here. For hand placement, your pinkies will go on the rings. **2 total work sets**

Rest Period – 3 minutes between work sets

Do 3 sets of 12 here. Raise under control and keep tension on the rear delts through the full range. 3 total work sets

This is an example of what it could look like:

95 x 3 – Feeder set

105 x 4 – Feeder set

135 x 8 – **RPE 8** (Hold the first and last rep for a two count at the top)

155 x 5 – **RPE 9** (Hold the first and last rep for a two count at the top)

Pro Tip

Stopping an inch or two short of touching your chest will take away significant stress from the rotator cuff and keep your shoulders healthier.

4/ Shoulders | Dumbbell Y raises

Raise the dumbbells to 10 and 2 o'clock and feel the burn!
r control and keep tension on
the rear delts through the full range. 3 total work sets

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

20's x 12 – **RPE 9**

20's x 12 – **RPE 9**

20's x 12 – **RPE 9**

Note – If you have had shoulder issues, I would advise adding in Spidercrawls here.

Spidercrawls

We love these for shoulder health and rear delt pumps. Going up and down 3 times is 1 set. Go down below the waist and come up to over your head. **3 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

25 lb short mini band · Up and down 3 times – **RPE 9**

25 lb short mini band · Up and down 3 times – **RPE 9**

25 lb short mini band · Up and down 3 times – **RPE 9**

5/ Triceps | Dual rope triceps extensions

Do 4 sets of 12 here reaching failure. **4 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

120 lbs. x 12 – **RPE 9-10**

120 lbs. x 12 – **RPE 9-10**

120 lbs. x 12 – **RPE 9-10**

120 lbs. x 12 – **RPE 9-10**

6/ Triceps | Dumbbell triceps kickouts

Use a slow tempo and absolutely perfect form on these. Do 3 sets of 8. **3 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

30's x 8 – **RPE 9**

30's x 8 – **RPE 9**

30's x 8 – **RPE 9**

Day 3 – Upper body pull focus

Back	3 exercises	9 sets
Rear delts	1 exercise	3 sets
Biceps	2 exercises	6 sets
6 exercises		18 sets

1/ Back | Chest supported row

Use a machine that has a chest pad so you can eliminate lower back stress. Use a pronated grip (palms facing down). These are meant to target your lower traps, rhomboids, and rear delts. Do 3 sets of 8 here. Use a full range of motion really stretching out in the lengthened position.

3 total work sets

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

50 lbs. x 15 – Warm up
 50 lbs. x 10 – Warm up
 90 lbs. x 4 – Feeder set
 140 lbs. x 8 – **RPE 9**
 140 lbs. x 8 – **RPE 9**
 140 lbs. x 8 – **RPE 9**

2/ Back | One arm barbell row

The goal here is to work your lats hard. Do two low rep feeder sets to get you to your working weight. Do two hard sets of 10 to start. Next up is your money set. Do around 10, where 10 is failure. If you do 9 or 11, that's ok, we just need that last rep to be failure with good form. If you get 12 or more, you didn't go heavy enough. After you do your 10, drop the weight 25-30% and grind out as many more reps as you can. Treat your arms as simple attachments, do not pull with your biceps. **3 total work sets**

***It is ok if you lose a few reps on these, as fatigue may start to set in.**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

50 x 5 – Feeder set
 75 x 5 – Feeder set
 100 x 10 – **RPE 10**
 100 x 10 – **RPE 10**
 100 x 10, then 75 x 10 – **RPE 12**

3/ Back | Banded pull ups

Do 3 sets to failure here. Use a 40-80 lb light band for most lifters. If you are strong at these, use a 5-35 lb mini band. Stretch hard at the bottom, drive up high, and on the last set hold your final rep at midrange as long as possible. 3 total work sets

This is an example of what it could look like:

Pullups to failure – **RPE 10**

Pullups to failure – **RPE 10**

Pullups to failure, isohold at midrange for as long as possible – **RPE 12**

Pro Tip

Keep your sternum arched. Do not let your chest cave in. Drive your elbows down to lift your body instead of pulling with your arms. Flex your lats hard through the full range of motion.

4/ Rear delts | Machine rear delt flyes

Do 3 sets of 30 here. High reps and fighting through burn equals growth for rear delts. They are also important stabilizers for your bench work. **3 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

115 lbs. x 30 – **RPE 8-9**

115 lbs. x 30 – **RPE 8-9**

115 lbs. x 30 – **RPE 8-9**

5/ Biceps | Slight incline hammer dumbbell curls

You are going to do 1 warm up set first. Each work set will be 10 full reps, and then 5 slow partials out of the bottom. Do 3 sets like this. Use a slight incline and keep the reps controlled. 3 total work sets

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

20 lbs. x 15 – Warm up

30 lbs. x 10, then 5 partials – **RPE 12**

30 lbs. x 10, then 5 partials – **RPE 12**

30 lbs. x 10, then 5 partials – **RPE 12**

6/ Biceps | Preacher curls

Do 3 working sets close to failure shooting for about 8 reps. Use slow and controlled form. **3 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

55 lbs. x 8 – **RPE 9-10**

55 lbs. x 8 – **RPE 9-10**

55 lbs. x 8 – **RPE 9-10**

Day 4 – Lower body focus

Abs	1 exercise	3 sets
Legs	5 exercises	12 sets
Speed pulls	1 exercise	15 sets (these are all dynamic speed sets)
Calves	1 exercise	4 sets
8 exercises		34 sets

Warm up rotation

1. Hanging Leg Raises - 6-10 reps
2. Plank – 15 seconds
3. Band Pull Apart with long micro mini band – 15 reps

Do 3 rounds here.

1/ Legs | Seated leg curls

On max effort squat days we use a little more volume on our leg curls, as opposed to just sky high intensity. You will do 3-4 warm up sets and then do 3 hard sets of 10 reps.

3 total work sets

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

50 x 15 – Warm up set
 70 x 12 – Warm up set
 90 x 6 – Feeder set
 130 x 10 – **RPE 9**
 130 x 10 – **RPE 9**
 130 x 10 – **RPE 9**

2/ Legs | Max effort barbell squats

Today is maximal effort squat day. You will be working up to a tough set of 3 with perfect form. You will follow that up with 2 sets of 5 with 70% of your 1 rep squat max. Follow the prescribed setup and execution cues carefully. Use a medium stance here. If you have a SS Yoke bar or a spider bar, use that here. If not, use a high bar position. Stick with the bar you use here for the first 3 weeks during block 1.
 3 total work sets

This is an example of what it could look like:

135 x 10 – Warm up
 185 x 8 – Warm up
 225 x 4 – Feeder set
 275 x 4 – Feeder set
 315 x 3 – **RPE 8**
 275 x 5 – 70% of 1 rep maximum squat (Hold the first and last rep for a two count at the top)
 275 x 5 – 70% of 1 rep maximum squat (Hold the first and last rep for a two count at the top)

Work set % – 70% on last 2 sets

3/ Speed pulls

These are standard conventional deadlifts done with high velocity. Use a double overhand grip with straps. You are going to be using 55% of your 1 rep maximum deadlift to do 15 singles. Follow the prescribed setup and execution cues carefully. 15 total work sets

This is an example of what it could look like:

135 x 3 – Warm up

185 x 3 – Warm up

225 x 3 – Feeder set

275 for 15 x 1 – This assumes 275 is 55% of your 1 rep max.

Rest Period – 10 seconds between work sets

Work set % – 55%

4/ Legs | Hack squat

Use the foot placement that allows you to use the most range of motion safely. We like these to be done deep. You are going to work up to a hard set of 8 for your first set. On your next set, you are doing a cluster set. Use the cluster structure described here. It is basically 3 mini sets in one with 20 second breaks. 2 total work sets

This is an example of what it could look like:

1 plate per side x 6 – Feeder set

2 plates per side x 4 – Feeder set

3 plates per side x 8 – **RPE 8**

3 plates per side x 8, rest 20 seconds and then go very close to failure, rest 20 seconds and then go right up to failure – **RPE 13**

5/ Legs | Bulgarian drop set of death

Get right mentally for this. Do 3 sets of 5 working your way up with dumbbells. These are meant to be easy, and not brutal. However, the work set will be brutal. You will use the dumbbells that you used working up for a drop set.

Each set will involve 8 reps ending with an 8 second isohold then dropping the weight. If you do the isohold right it will feel like a knife going into your glute. Follow the rep scheme below for all the details. Make sure you rest 3 minutes before doing the 2nd leg. You will need the break. Do not rush straight into the 2nd leg. 1 total work set

This is an example of what it could look like:

20 lbs. x 5 – Feeder set

30 lbs. x 5 – Feeder set

40 lbs. x 5 – Feeder set

50 lbs. x 8 and then an 8 second isohold near the top, then drop to 40 lbs. x 8 and an 8 second isohold, then drop to 30 lbs. and repeat, and finally 20 lbs. to finish. Many people cannot complete this and do bodyweight only at the end. Let's see how you do. – **RPE 13**

6/ Legs | Barbell stiff legged deadlifts

You are going to be pretty smoked at this point, and your quads will have a massive pump. Do these nice and slow. Do 3 sets of 8. **3 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

135 x 4 – Feeder set

185 x 8 – **RPE 8**

185 x 8 – **RPE 8**

185 x 8 – **RPE 8**

7/ Calves | Seated calf raises

Do 4 sets of 15 here. Work the stretch hard at the bottom. Don't forget to do your tibialis work in between sets.

4 total work sets

Rest Period – 1 minute between work sets

This is an example of what it could look like:

75 lbs. x 10 – Warm up

125 x 5 – Feeder set

125 x 15 – **RPE 9-10**

125 x 15 – **RPE 9-10**

125 x 15 – **RPE 9-10**

125 x 15 – **RPE 9-10**

8/ Abs | Sit ups

Use controlled form on these they are not just a standard sit up. I'd like to see 3 sets of 10 if possible. If this is not possible, just do what you can. If this is too easy, then do 3 sets of 15-20. 3 total work sets

Rest Period – 1 minute between work sets

RPE 8-10

This is an example of what it could look like:

Week 1 – 3 x 10 (30 total reps)

Week 2 – 3 x 11 (33 total reps)

Week 3 – 3 x 12 (36 total reps)

Week 4 – 3 x 13 (39 total reps)

Week 5 – 3 x 14 (42 total reps)

Week 6 – 3 x 15 (45 total reps)

Week 7 – We will rotate out exercis

Day 5 – Upper body push focus

Chest	4 exercises	10 sets
Shoulders	2 exercises	6 sets
Triceps	2 exercises	7 sets
8 exercises		23 sets

Warm up rotation

1. Hanging Leg Raises – 6-10 reps
2. Plank – 15 seconds
3. Band Pull Apart with long micro mini band – 15 reps

Do 3 rounds here.

1/ Chest | Slight decline dumbbell press

Put a 25 under the end of the bench where your feet are. Do a few warm ups, then low rep feeder sets until you get to your big set. Do about 8 reps there. We'll then do a 2nd all out set there where you try to match the number, and then drop the weight 30% and go to failure again. **2 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

25's x 20 – Warm up

45's x 15 – Warm up

65's x 6 – Feeder set

85's x 6 – Feeder set

105's x 4 – Feeder set

120's x 8 – **RPE 9**

120's x 8. Dropped to 90 and got 6 more – **RPE 12**

2/ Chest | Max effort medium grip high incline benches

Today is a maximal strength bench day. There is a really heavy emphasis on shoulders and triceps here. This grip allows for more range of motion as your elbows should be tucked in slightly (not flared). This is key, and also aids in injury prevention. You are going to work up to a set of 3 here with perfect form. You will then follow that up with 2 sets of 2 with 80% of your 1 rep maximum done with a very slow and controlled tempo. Lower with a 3 count. **3 total work sets**

Rest Period – 2 minutes between work set

Work set % – 80% on last 2 sets

This is an example of what it could look like:

135 x 10 – Warm up

135 x 10 – Warm up

185 x 4 – Feeder set

205 x 3 – **RPE 9**

200 x 2 (slow tempo) – This assumes 200 is 80% of your 1 rep max. (Hold the first and last rep for a two count at the top)

200 x 2 (slow tempo) – This assumes 200 is 80% of your 1 rep max. (Hold the first and last rep for a two count at the top)

3/ Chest | Slight incline dumbbell press

Put a 25 under the end of the bench where your head is. If you have a really good adjustable bench, you can do the setting that is a tad higher (more like 15-20 degrees). Do a few low rep feeder sets until you get to your big set. Do about 8 reps there. We'll then do a 2nd all out set there where you try to match the number, and then drop the weight 30% and go to failure again. **2 total work sets**

Use the form notes here. Try to do these with your feet out in front. If you cannot, that is ok. Also, do not keep your elbows tight to your body; let them travel out a little bit. Shoot

This is an example of what it could look like:

45's x 4 – Feeder set

65's x 4 – Feeder set

85's x 8 – **RPE 9**

85's x 8. Drop to 60's and get 6 more – **RPE 12**

Use the form notes here. Try to do these with your feet out suggest. Try to do these with your feet out in front as shown in front. If you cannot, that is ok. Also, do not keep your elbows tight to your body; let them travel out a little bit. Shoot for 3 sets of around 8 to 10 reps. If you can do more than that, simply add weight. If you can't do that, use an assist machine. **3 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

Bodyweight plus added weight via dip belt or hanging chain around neck x 8 – **RPE 10**

Bodyweight plus added weight via dip belt or hanging chain around neck x 8 – **RPE 10**

Bodyweight plus added weight via dip belt or hanging chain around neck x 8 – **RPE 10**

5/ Shoulders | Dumbbell heavy side lateral partials/swings

Do 1 warm up set here before doing your heavy sets. Do 3 hard sets of 20 reps here. **3 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

25 lbs. x 15 – Warm up

35 lbs. x 20 – **RPE 9**

35 lbs. x 20 – **RPE 9**

35 lbs. x 20 – **RPE 9**

6/ Shoulders | Machine rear delt flyes

Do 3 sets of 15 here today. We are bringing the reps down from earlier in the week to use a little more weight. All of this rear delt work is going to pay off. You will have sledgehammer rear delts. **3 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

135 lbs. x 15 – **RPE 8-9**

135 lbs. x 15 – **RPE 8-9**

135 lbs. x 15 – **RPE 8-9**

7/ Triceps | Kettlebell Tate press

Do 4 sets of 12 here reaching failure. If you do not have kettlebells you can use dumbbells. **4 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

25 lbs. x 12 – **RPE 9-10**

25 lbs. x 12 – **RPE 9-10**

25 lbs. x 12 – **RPE 9-10**

25 lbs. x 12 – **RPE 9-10**

8/ Triceps | Dumbbell lying extensions

Use a slow tempo and absolutely perfect form on these. Do these lying on the floor and pause each rep at the bottom.

Do 3 sets of 8. **3 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

30's x 8 – **RPE 9**

30's x 8 – **RPE 9**

30's x 8 – **RPE 9**

DAYS 6 & 7

OFF - FAMILY DAY

Recover hard. Come back ready to move weight.

BLOCK 1 OF 3

WEEK 2

Progressions are in bold. Hit the new goals with clean execution.

WEEK 2

Day 1 – Lower body focus

Abs	1 exercise	3 sets
Legs	3 exercises	18 sets (15 of these are dynamic speed sets)
Low back	1 exercise	3 sets
Calves	1 exercise	3 sets
6 exercises		27 sets

Day 2 – Upper body push focus

Chest	2 exercises	14 sets (12 of these are dynamic speed sets)
Shoulders	2 exercises	5 sets
Triceps	2 exercises	7 sets
6 exercises		26 sets

Day 3 – Upper body pull focus

Back	3 exercises	9 sets
Rear delts	1 exercise	3 sets
Biceps	2 exercises	6 sets
6 exercises		18 sets

Day 4 – Lower body focus

Abs	1 exercise	3 sets
Legs	5 exercises	13 sets
Speed pulls	1 exercise	15 sets (these are all dynamic speed sets)
Calves	1 exercise	4 sets
8 exercises		35 sets

Day 5 – Upper body push focus

Chest	4 exercises	10 sets
Shoulders	2 exercises	6 sets
Triceps	2 exercises	7 sets
8 exercises		23 sets

Days 6 & 7 - OFF - Family Days

Day 1 – Lower body focus

Abs	1 exercise	3 sets
Legs	3 exercises	18 sets (15 of these are dynamic speed sets)
Low back	1 exercise	3 sets
Calves	1 exercise	3 sets
6 exercises		27 sets

Warm up rotation

1. Hanging Leg Raises - 6-10 reps
2. Plank - 15 seconds
3. Band Pull Apart with long micro mini band - 15 reps

Do 3 rounds here.

1/ Legs | Lying leg curls

Repeat what you did last week but add 5 additional partials out of the bottom for 15 partials as part of the last set. It will consist of doing 8 reps, then dropping the weight and doing another 8, followed by 15 slow partials out of the stretch position. **1 total work set**

Rest Period – N/A – only 1 work set

This is an example of what it could look like:

50 x 15 – Warm up
 70 x 12 – Warm up
 90 x 6 – Feeder set
 110 x 8, 90 x 8, 90 x 15 partials – **RPE 13**

2/ Legs | Dynamic squats

We are adding 5 additional sets here this week. Continue to focus on speed and producing force as fast as you can here. Do 15 sets of 2 here. **15 total work sets**

For work sets use 55% of your 1 rep maximum squat.

Rest Period – 30 seconds between work sets

Work set % – 55%

This is an example of what it could look like:

135 x 10 – Warm up
 185 x 8 – Warm up
 225 x 4 – Feeder set
 275 for 15 x 2 - This assumes 275 is 55% of your 1 rep max.

3/ Legs | Leg press

Use a narrow stance with your feet in the middle of the platform. This is going to hit your quads hard. **Do a few warm up sets then 2 tough sets of 12 using the same weight you did last week for 10.** Use the same weight as last week but try to get 2 additional reps. **2 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

2 plates per side x 6 – Feeder to get feel of movement

3 plates per side x 6 – Feeder set

4 plates per side x 12 – **RPE 8**

4 plates per side x 12 – **RPE 8**

4/ Low back | Barbell hyperextensions

Do these nice and slow. **Try to add 2 additional reps to what you did last week with the same weight.** Make sure you are set up on the pad correctly. You should feel this in your low back, hams, and glutes. **Do 3 sets of 10. 3 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

Bodyweight x 10 – Warm up

135 x 10 – **RPE 8**

135 x 10 – **RPE 8**

135 x 10 – **RPE 8**

5/ Abs | Decline leg raise

We would like to see 3 sets of 11 if possible. If this is not possible, just do what you can. If this is too easy, then do 3 sets of 15-20. **3 total work sets**

Goal – Progress weekly on these by adding 1 rep per set.

Rest Period – 1 minute between work sets

RPE 8-10

This is an example of what it could look like:

Week 1 – 3 x 10 (30 total reps)

Week 2 – 3 x 11 (33 total reps)

Week 3 – 3 x 12 (36 total reps)

Week 4 – 3 x 13 (39 total reps)

Week 5 – 3 x 14 (42 total reps)

Week 6 – 3 x 15 (45 total reps)

Week 7 – We will rotate out this exercise

6/ Calves | Standing calf raises

Do 3 heavy sets of 10 here with the same weight you used last week for sets of 8. Work the stretch hard at the bottom. **3 total work sets**

In between ALL sets of calves, you will be doing tibialis anterior work. Do sets of 25. This is for every calf workout you do from here on out!

Rest Period – 1 minute between work sets

This is an example of what it could look like:

75 lbs. x 10 – Warm up

125 x 5 – Feeder

175 x 10 – **RPE 9-10**

175 x 10 – **RPE 9-10**

175 x 10 – **RPE 9-10**

Day 2 – Upper body push focus

Chest	2 exercises	14 sets (12 of these are dynamic speed sets)
Shoulders	2 exercises	5 sets
Triceps	2 exercise	7 sets
6 exercises		26 sets

Warm up rotation

1. Hanging Leg Raises – 6-10 reps
2. Plank – 15 seconds
3. Band Pull Apart with long micro mini band – 15 reps

Do 3 rounds here.

1/ Chest | Dynamic benches

We are adding 3 additional sets here this week. Continue to focus on speed and producing maximum force as fast as you can. Remember to use 3 different grips here. The first 4 sets are with a grip one finger away from the smooth part of the bar. The next 4 sets are where your pinky will be on the ring. The last 4 sets your forefinger will be on the ring. Do 12 sets of 3 here. **12 total work sets**

For work sets use 55% of max weight.

Rest Period – 30 seconds between work sets

Work set % – 55%

This is an example of what it could look like:

135 x 10 – Warm up
 135 x 10 – Warm up
 185 x 4 – Feeder set
 225 for 12 x 3 – This assumes 225 is 55% of your 1 rep max.

2/ Chest | Slight incline dumbbell press

Do a few warm ups, then low rep feeder sets until you get to your big set. Do about 8 reps there. **Try to use 5 lbs. more than what you used last week here.** We'll then do a 2nd all out set there where you try to match the number, and then drop the weight 30% and go to failure again. **2 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

45's x 15 – Warm up
 65's x 4 – Feeder set
 90's x 8 – **RPE 9**
 90's x 8. Drop to 65's and go to failure – **RPE 12**

3/ Shoulders | High incline Smith press

You should be pretty warmed up but make sure you still do 1-2 feeder sets to get the feel of the angle and weight. On the work sets hold the first rep at the top for a 2 count. Next, do the rest of the reps with normal tempo. On the last rep, before racking, hold for a two count at the top again. This hold will be key for strength development We want a tough set of 8 then 5. Please keep form perfect on these sets. **Try to beat what you did last week by at least 5 lbs.** this week. No sloppy form allowed here. Use a medium grip here. For hand placement, your pinkies will go on the rings.

2 total work sets

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

95 x 3 – Feeder set

205 x 4 – Feeder set

140 x 8 – **RPE 8** (Hold the first and last rep for a two count at the top)

160 x 5 – **RPE 9** (Hold the first and last rep for a two count at the top)

4/ Shoulders | Dumbbell Y raises

Raise the dumbbells to 10 and 2 o'clock and feel the burn! Do 3 sets of 14 here. **This is 2 more reps than last week with the same weight.** **3 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

20's x 14 – **RPE 9**

20's x 14 – **RPE 9**

20's x 14 – **RPE 9**

Note – If you have had shoulder issues, I would advise adding in Spidercrawls here.

Spidercrawls

We are adding a set here for your progression. Next week we will go to 5 sets, then we will swap this out. Going up and down 3 times is 1 set. Go down below the waist and come up to over your head. **4 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

25 lb short mini band · Up and down 3 times – **RPE 9**

25 lb short mini band · Up and down 3 times – **RPE 9**

25 lb short mini band · Up and down 3 times – **RPE 9**

25 lb short mini band · Up and down 3 times – **RPE 9**

5/ Triceps | Dual rope triceps extensions

Do 4 sets of 12 here reaching failure. **Go heavier this week on these and still get 12 reps on your sets.** **4 total work sets**

Rest Period – 2 minutes between work sets

130 lbs. x 12 – **RPE 9-10**

130 lbs. x 12 – **RPE 9-10**

130 lbs. x 12 – **RPE 9-10**

130 lbs. x 12 – **RPE 9-10**

6/ Triceps | Dumbbell triceps kickouts

Use a slow tempo and absolutely perfect form on these. Do 3 sets of 8. **For your progression here, slow down your tempo even more than last week. 3 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

30's x 8 – **RPE 9**

30's x 8 – **RPE 9**

30's x 8 – **RPE 9**

Day 3 – Upper body pull focus

Back	3 exercises	9 sets
Rear delts	1 exercise	3 sets
Biceps	2 exercises	6 sets
6 exercises		18 sets

1/ Back | Chest supported row

Use a machine that has a chest pad so you can eliminate lower back stress. Use a pronated grip (palms facing down). These are meant to target your lower traps, rhomboids, and rear delts. **Do 3 sets of 8 here again but try to add 10-20 lbs. more than you used last week.** Use a full range of motion really stretching out in the lengthened position.

3 total work sets

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

50 lbs. x 15 – Warm up
 50 lbs. x 10 – Warm up
 90 lbs. x 6 – Feeder set
 150 lbs. x 8 – **RPE 9**
 150 lbs. x 8 – **RPE 9**
 150 lbs. x 8 – **RPE 9**

2/ Back | One arm barbell row

Do two low rep feeder sets to get you to your working weight. **Bump your reps to 12 this week with the same weight you used last week.** Do two hard sets of 12 to start. Next up is your money set. After you do your 12, drop the weight 25-30% and grind out as many more reps as you can. Treat your arms as simple attachments, do not pull with your biceps. **3 total work sets**

***It is ok if you lose a few reps on these, as fatigue may start to set in.**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

50 x 5 – Feeder set
 75 x 5 – Feeder set
 100 x 12 – **RPE 10**
 100 x 12 – **RPE 10**
 100 x 12, then 75 x 10 – **RPE 12**

3/ Back | Banded pull ups

Do 3 sets to failure here. On the last set, hold your last rep in the middle part of the range of motion (isohold) for as long as you can. **3 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

Pullups to failure – **RPE 10**
 Pullups to failure – **RPE 10**
 Pullups to failure, isohold at midrange for as long as possible – **RPE 12**

4/ Rear delts | Machine rear delt flyes

Do 3 sets of 30 here. High reps and fighting through burn equals growth for rear delts. They are also important stabilizers for your bench work. **3 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

115 lbs. x 30 – **RPE 8-9**

115 lbs. x 30 – **RPE 8-9**

115 lbs. x 30 – **RPE 8-9**

5/ Biceps | Slight incline hammer dumbbell curls

You are going to do 1 warm up set first. Each work set will be doing 10 full reps, and then 5 slow partials out of the bottom. Do 3 sets like this. **Reduce your rest period by 15 seconds on these this week. 3 total work sets**

Rest Period – 1 minute and 45 seconds between work sets

This is an example of what it could look like:

20 lbs. x 15 – Warm up

30 lbs. x 10, then 5 partials – **RPE 12**

30 lbs. x 10, then 5 partials – **RPE 12**

30 lbs. x 10, then 5 partials – **RPE 12**

6/ Biceps | Preacher curls

Do 3 working sets close to failure shooting for about 8 reps. Use slow and controlled form. **Reduce your rest period by 15 seconds on these this week. 3 total work sets**

Rest Period – 1 minute and 45 seconds between work sets

This is an example of what it could look like:

55 lbs. x 8 – **RPE 9-10**

55 lbs. x 8 – **RPE 9-10**

55 lbs. x 8 – **RPE 9-10**

Day 4 – Lower body focus

Abs	1 exercise	3 sets
Legs	5 exercises	13 sets
Speed pulls	1 exercise	15 sets (these are all dynamic speed sets)
Calves	1 exercise	4 sets
8 exercises		35 sets

Warm up rotation

1. Hanging Leg Raises - 6-10 reps
2. Plank – 15 seconds
3. Band Pull Apart with long micro mini band – 15 reps

Do 3 rounds here.

1/ Legs | Seated leg curls

We are adding one work set on these this week. You will do 3-4 warm up sets and then do 4 hard sets of 10 reps.

4 total work sets

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

50 x 15 – Warm up
 70 x 12 – Warm up
 90 x 6 – Feeder set
 130 x 10 – **RPE 9**
 130 x 10 – **RPE 9**
 130 x 10 – **RPE 9**
 130 x 10 – **RPE 9**

2/ Legs | Max effort barbell squats

You will be working up to a tough set of 3 with perfect form. You will follow that up with 3 sets of 5 with 70%, 75%, and 70% of your 1 rep squat max. **This is an additional set more than we did last week. The added set is also at 75%.** Notice the holds on the first and last reps in the example below. This means holding the bar at the top, not bottom.

3 total work sets

Rest Period – 3 minutes between work sets

Work set % – 70%, 75% and 70% on last 3 sets

This is an example of what it could look like:

135 x 10 – Warm up

185 x 8 – Warm up

225 x 4 – Feeder set

275 x 4 – Feeder set

315 x 3 – **RPE 8**

275 x 5 – 70% of 1 rep maximum squat (Hold the first and last rep for a two count at the top)

285 x 5 – 75% of 1 rep maximum squat (Hold the first and last rep for a two count at the top)

275 x 5 – 70% of 1 rep maximum squat (Hold the first and last rep for a two count at the top)

3/ Speed pulls

Remember to always use a double overhand grip with straps. You are going to be using 60% of your 1 rep maximum deadlift to do 15 singles. This is 5% more weight than last week, and you must keep your speed. **15 total work sets**

For work sets use 60% of your 1 rep maximum deadlift

Rest Period – 10 seconds between work sets

Work set % – 60%

This is an example of what it could look like:

135 x 3 – Warm up

185 x 3 – Warm up

225 x 3 – Feeder set

285 for 15 x 1 – This assumes 285 is 60% of your 1 rep max.

4/ Legs | Hack squat

Use the foot placement that allows you to use the most range of motion safely. We like these to be done deep. You are going to work up to a hard set of 8 for your first set. On your next set, you are doing a cluster set. **2 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

1 plate per side x 6 – Feeder to get feel of movement

2 plates per side x 4 – Feeder set

3 plates per side x 8 – **RPE 8**

3 plates per side x 8, rest 20 seconds and then go very close to failure, rest 20 seconds and then go right up to failure – **RPE 13**

5/ Legs | Bulgarian drop set of death

Do 3 sets of 5 working your way up with dumbbells. These are meant to be easy, and not brutal. However, the work set will be brutal. You will use the dumbbells that you used working up for a drop set. Each set will involve 8 reps ending with an 8 second isohold then dropping the weight. Make sure you rest 3 minutes before doing the 2nd leg. You will need the break. Do not rush straight into the 2nd leg.

1 total work set

Rest Period – Rest 3 minutes and then do other leg.

This is an example of what it could look like:

20 lbs. x 5 – Feeder set

30 lbs. x 5 – Feeder set

40 lbs. x 5 – Feeder set

50 lbs. x 8 and then an 8 second isohold near the top, then drop to 40 lbs. x 8 and an 8 second isohold, then drop to 30 lbs. and repeat, and finally 20 lbs. to finish. Many people cannot complete this and do bodyweight only at the end. Let's see how you do. – **RPE 13**

6/ Legs | Barbell stiff legged deadlifts

You are going to be pretty smoked at this point, and your quads will have a massive pump. Do these nice and slow. Do 3 sets of 8. **Try to increase your weight by 10 lbs. on these this week. 3 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

135 x 4 – Feeder set

195 x 8 – **RPE 8**

195 x 8 – **RPE 8**

195 x 8 – **RPE 8**

7/ Calves | Seated calf raises

Do 4 sets of 15 here. **Try to add 10 lbs. on all your sets here.** Work the stretch hard at the bottom. Don't forget to do your tibialis work in between sets. **4 total work sets**

Rest Period – 1 minute between work sets

This is an example of what it could look like:

75 lbs. x 10 – Warm up

125 x 5 – Feeder set

135 x 15 – **RPE 9-10**

135 x 15 – **RPE 9-10**

135 x 15 – **RPE 9-10**

135 x 15 – **RPE 9-10**

8/ Abs | Sit ups

I'd like to see 3 sets of 11 if possible. If this is not possible, just do what you can. If this is too easy, then do 3 sets of 15-20. **3 total work sets**

Goal – Progress weekly on these by adding 1 rep per set.

Rest Period – 1 minute between work sets

RPE 8-10

This is an example of what it could look like:

Week 1 – 3 x 10 (30 total reps)

Week 2 – 3 x 11 (33 total reps)

Week 3 – 3 x 12 (36 total reps)

Week 4 – 3 x 13 (39 total reps)

Week 5 – 3 x 14 (42 total reps)

Week 6 – 3 x 15 (45 total reps)

Week 7 – We will rotate out exercis

Day 5 – Upper body push focus

Chest	4 exercises	10 sets
Shoulders	2 exercises	6 sets
Triceps	2 exercises	7 sets
8 exercises		23 sets

Warm up rotation

1. Hanging Leg Raises – 6-10 reps
2. Plank – 15 seconds
3. Band Pull Apart with long micro mini band – 15 reps

Do 3 rounds here.

1/ Chest | Slight decline dumbbell press

Do a few warm ups, then low rep feeder sets until you get to your big set. Do about 8 reps there. **Add 5 more lbs. this week to your dumbbells.** We'll then do a 2nd all out set there where you try to match the number, and then drop the weight 30% and go to failure again. **2 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

25's x 20 – Warm up

45's x 15 – Warm up

65's x 6 – Feeder set

85's x 6 – Feeder set

105's x 4 – Feeder set

125's x 8 – **RPE 9**

125's x 8. Dropped to 90 and got 6 more – **RPE 12**

2/ Chest | Max effort medium grip high incline benches

Today is a maximal strength bench day. You are going to work up to a hard set of 3 here with perfect form. **The goal is to beat what you did last week by 10 lbs.** Notice how we implemented the holds here as well. Hold at the top, not the bottom. Own and control the weight. You will then follow that up with 2 sets of 4 (increased from 2) with 80% of your 1 rep maximum done with a very slow and controlled tempo. Lower the weight with a 3 count. **3 total work sets**

Rest Period – 2 minutes between work set

Work set % – 80% on last 2 sets

This is an example of what it could look like:

135 x 10 – Warm up

135 x 10 – Warm up

185 x 4 – Feeder set

215 x 3 – **RPE 9.** (Hold the start of the first rep for a two count and then hold the last rep for another 2 count before racking)

200 x 4 – This assumes 200 is 80% of your 1 rep max. (Hold the first and last rep for a two count at the top)

200 x 4 – This assumes 200 is 80% of your 1 rep max. (Hold the first and last rep for a two count at the top)

3/ Chest | Slight incline dumbbell press

Do a few low rep feeder sets until you get to your big set. Do about 8 reps there. We'll then do a 2nd all out set there where you try to match the number, and then drop the weight 30% and go to failure again. **2 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

45's x 4 – Feeder set

65's x 4 – Feeder set

85's x 8 – **RPE 9**

85's x 8. Drop to 60's and go to failure – **RPE 12**

4/ Chest | Dips

Shoot for 3 sets of around 8 to 10 reps. If you can do more than that, simply add weight. If you can't do that, use an assist machine. **3 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

Bodyweight plus added weight via dip belt or hanging chain around neck x 8 – **RPE 10**

Bodyweight plus added weight via dip belt or hanging chain around neck x 8 – **RPE 10**

Bodyweight plus added weight via dip belt or hanging chain around neck x 8 – **RPE 10**

5/ Shoulders | Dumbbell heavy side lateral partials/swings

Do 1 warm up set here before doing your heavy sets. Do 3 hard sets of 20 reps here. **Try to use 5 more lbs. than you did last week and still get the reps. 3 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

25 lbs. x 15 – Warm up

40 lbs. x 20 – **RPE 9**

40 lbs. x 20 – **RPE 9**

40 lbs. x 20 – **RPE 9**

6/ Shoulders | Machine rear delt flyes

Do 3 sets of 15 here today. We are bringing the reps down from earlier in the week to use a little more weight. All of this rear delt work is going to pay off. You will have sledgehammer rear delts. **3 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

135 lbs. x 15 – **RPE 8-9**

135 lbs. x 15 – **RPE 8-9**

135 lbs. x 15 – **RPE 8-9**

7/ Triceps | Kettlebell Tate press

Do 4 sets of 12 here reaching failure. **Do your best to use 5 more lbs. here, even 2.5's would be good!** If you do not have kettlebells you can use dumbbells. *4 total work sets*

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

30 lbs. x 12 – **RPE 9-10**

30 lbs. x 12 – **RPE 9-10**

30 lbs. x 12 – **RPE 9-10**

30 lbs. x 12 – **RPE 9-10**

8/ Triceps | Dumbbell lying extensions

Use a slow tempo and absolutely perfect form on these. Do these lying on the floor and pause each rep at the bottom. **Do 3 sets of 10 using the same weight you used last week (you did 8 reps last week).** *3 total work sets*

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

30's x 10 – **RPE 9**

30's x 10 – **RPE 9**

30's x 10 – **RPE 9**

BLOCK 1 OF 3

WEEK 3

Progressions are in bold. Hit the new goals with clean execution.

WEEK 3

Day 1 – Lower body focus

Abs	1 exercise	3 sets
Legs	3 exercises	23 sets (20 of these are dynamic speed sets)
Low back	1 exercise	3 sets
Calves	1 exercise	3 sets
6 exercises		32 sets

Day 2 – Upper body push focus

Chest	2 exercises	17 sets (15 of these are dynamic speed sets)
Shoulders	2 exercises	5 sets
Triceps	2 exercises	7 sets
6 exercises		29 sets

Day 3 – Upper body pull focus

Back	3 exercises	9 sets
Rear delts	1 exercise	3 sets
Biceps	2 exercises	6 sets
6 exercises		18 sets

Day 4 – Lower body focus

Abs	1 exercise	3 sets
Legs	5 exercises	13 sets
Speed pulls	1 exercise	15 sets (these are all dynamic speed sets)
Calves	1 exercise	4 sets
8 exercises		35 sets

Day 5 – Upper body push focus

Chest	4 exercises	10 sets
Shoulders	2 exercises	6 sets
Triceps	2 exercises	7 sets
8 exercises		23 sets

Days 6 & 7 - OFF - Family Days

Day 1 – Lower body focus

Abs	1 exercise	3 sets
Legs	3 exercises	23 sets (20 of these are dynamic speed sets)
Low back	1 exercise	3 sets
Calves	1 exercise	3 sets
6 exercises		32 sets

Warm up rotation

1. Hanging Leg Raises – 6-10 reps
2. Plank – 15 seconds
3. Band Pull Apart with long micro mini band – 15 reps

Do 3 rounds here.

1/ Legs | Lying leg curls

Repeat what you did last week but add 5 additional partials out of the bottom for 20 partials as part of the last set. It will consist of doing 8 reps, then dropping the weight and doing another 8, followed by 20 slow partials out of the stretch position. These are going to burn like fire but work through it. **1 total work set**

Rest Period – N/A – only 1 work set

This is an example of what it could look like:

50 x 15 – Warm up set
 70 x 12 – Warm up set
 90 x 6 – Feeder set (low rep sets designed to get you to your top set without exhausting you)
 110 x 8, 90 x 8, 90 x 20 partials – **RPE 13**

2/ Legs | Dynamic squats

We are adding 5 additional sets here this week. Do 20 sets of 2 here. **20 total work sets**

For work sets use 55% of your 1 rep maximum squat.

Rest Period – 30 seconds between work sets

Work set % – 55%

This is an example of what it could look like:

135 x 10 – Warm up
 185 x 8 – Warm up
 225 x 4 – Feeder set
 275 for 20 x 2 – This assumes 275 is 55% of your 1 rep max.

3/ Legs | Leg press

Do a few warm up sets then 2 tough sets of 14 using the same weight you did last week for 12. 2 total work sets

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

2 plates per side x 6 – Feeder to get feel of movement

3 plates per side x 6 – Feeder set

4 plates per side x 14 – **RPE 9**

4 plates per side x 14 – **RPE 9**

4/ Low back | Barbell hyperextensions

Do these nice and slow. **Try to add 2 additional reps to what you did last week with the same weight.** Make sure you are set up on the pad correctly. You should feel this in your low back, hams, and glutes. **Do 3 sets of 12. 3 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

Bodyweight x 10 – Warm up

135 x 12 – **RPE 8**

135 x 12 – **RPE 8**

135 x 12 – **RPE 8**

5/ Abs | Decline leg raise

We'd like to see 3 sets of 12 if possible. If this is not possible, just do what you can. If this is too easy, then do 3 sets of 15-20. **3 total work sets**

Goal – Progress weekly on these by adding 1 rep per set.

Rest Period – 1 minute between work sets

RPE 8-10

This is an example of what it could look like:

Week 1 – 3 x 10 (30 total reps)

Week 2 – 3 x 11 (33 total reps)

Week 3 – 3 x 12 (36 total reps)

Week 4 – 3 x 13 (39 total reps)

Week 5 – 3 x 14 (42 total reps)

Week 6 – 3 x 15 (45 total reps)

Week 7 – We will rotate out this exercise

6/ Calves | Standing calf raises

Do 3 heavy sets of 12 here with the same weight you used last week for sets of 10. Work the stretch hard at the bottom. **3 total work sets**

Rest Period – 1 minute between work sets

This is an example of what it could look like:

75 lbs. x 10 – Warm up

125 x 5 – Feeder

175 x 12 – **RPE 9-10**

175 x 12 – **RPE 9-10**

175 x 12 – **RPE 9-10**

Day 2 – Upper body push focus

Chest	2 exercises	17 sets (15 of these are dynamic speed sets)
Shoulders	2 exercises	5 sets
Triceps	2 exercise	7 sets
6 exercises		29 sets

Warm up rotation

1. Hanging Leg Raises – 6-10 reps
2. Plank – 15 seconds
3. Band Pull Apart with long micro mini band – 15 reps

Do 3 rounds here.

1/ Chest | Dynamic benches

We are adding 3 additional sets here this week. The first 5 sets are with a grip one finger away from the smooth part of the bar. The next 5 sets are where your pinky will be on the ring. The last 5 sets your forefinger will be on the ring. Do 15 sets of 3 here. **15 total work sets**

For work sets use 55% of max weight.

Rest Period – 30 seconds between work sets

Work set % – 55%

This is an example of what it could look like:

135 x 10 – Warm up

135 x 10 – Warm up

185 x 4 – Feeder set

225 for 15 x 3 – This assumes 225 is 55% of your 1 rep max.

2/ Chest | Slight incline dumbbell press

Do a few warm ups, then low rep feeder sets until you get to your big set. Do about 8 reps there. **Try to use 5 lbs. more than what you used last week here.** We'll then do a 2nd all out set there where you try to match the number, and then drop the weight 30% and shoot for another 6.

2 total work sets

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

45's x 15

65's x 4

95's x 8 – **RPE 9**

95's x 8. Drop to 70's and go to failure – **RPE 12**

3/ Shoulders | High incline Smith press

On the work sets continue to hold the first rep at the top for a 2 count. Next, do the rest of the reps with normal tempo. On the last rep, before racking, hold for a two count. This hold will be key for strength development We want a tough set of 8 then 5. Please keep form perfect on these sets. **Try to beat what you did last week by at another 5 lbs. this week.** No sloppy form allowed here. Use a medium grip here. For hand placement, your pinkies will go on the rings.
2 total work sets

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

95 x 3

205 x 4

145 x 8 – **RPE 8** (Hold the first and last rep for a two count at the top)

165 x 5 – **RPE 9** (Hold the first and last rep for a two count at the top)

4/ Shoulders | Dumbbell Y raises

Raise the dumbbells to 10 and 2 o'clock and feel the burn! Do 3 sets of 16 here. **This is 2 more reps than last week with the same weight.** *3 total work sets*

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

20's x 16 – **RPE 9**

20's x 16 – **RPE 9**

20's x 16 – **RPE 9**

Note – If you have had shoulder issues, I would advise adding in Spidercrawls here.

Spidercrawls

We are adding a set here for your progression. We go to 5 sets this week. This is your last week on these.
5 total work sets

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

25 lb short mini band · Up and down 3 times – **RPE 9**

25 lb short mini band · Up and down 3 times – **RPE 9**

25 lb short mini band · Up and down 3 times – **RPE 9**

25 lb short mini band · Up and down 3 times – **RPE 9**

25 lb short mini band · Up and down 3 times – **RPE 9**

5/ Triceps | Dual rope triceps extensions

Do 4 sets of 14 here reaching failure. **You are adding two more reps this week.** *4 total work sets*

Rest Period – 2 minutes between work sets

130 lbs. x 14 – **RPE 9-10**

130 lbs. x 14 – **RPE 9-10**

130 lbs. x 14 – **RPE 9-10**

130 lbs. x 14 – **RPE 9-10**

6/ Triceps | Dumbbell triceps kickouts

Continue to use a slow tempo and absolutely perfect form on these. Do 3 sets of 8. **For your progression here, use more weight this week. 3 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

35's x 8 – **RPE 9**

35's x 8 – **RPE 9**

35's x 8 – **RPE 9**

Day 3 – Upper body pull focus

Back	3 exercises	9 sets
Rear delts	1 exercise	3 sets
Biceps	2 exercises	6 sets
6 exercises		18 sets

1/ Back | Chest supported row

Use a pronated grip (palms facing down). These are meant to target your lower traps, rhomboids, and rear delts. **Do 3 sets of 8 here again but try to add another 10 lbs. more than you used last week.** Use a full range of motion really stretching out in the lengthened position. **3 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

50 lbs. x 15 – Warm up
 50 lbs. x 10 – Warm up
 90 lbs. x 6 – Feeder set
 160 lbs. x 8 – **RPE 9**
 160 lbs. x 8 – **RPE 9**
 160 lbs. x 8 – **RPE 9**

2/ Back | One arm barbell row

Do two low rep feeder sets to get you to your working weight. **Bump your weight this week by 10 lbs.** Do two hard sets of 12 to start. Next up is your money set. After you do your 12, drop the weight 25-30% and grind out as many more reps as you can. Treat your arms as simple attachments, do not pull with your biceps. **3 total work sets**

***It is ok if you lose a few reps on these, as fatigue may start to set in.**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

50 x 5 – Feeder set
 75 x 5 – Feeder set
 110 x 12 – **RPE 10**
 110 x 12 – **RPE 10**
 110 x 12, then 80 x 10 – **RPE 12**

3/ Back | Banded pull ups

Do 3 sets to failure here. On the last set, hold your last rep in the middle part of the range of motion (isohold) for as long as you can. **3 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

Pullups to failure – **RPE 10**
 Pullups to failure – **RPE 10**
 Pullups to failure, isohold at midrange for as long as possible – **RPE 12**

4/ Rear delts | Machine rear delt flyes

Do 3 sets of 30 here. **3 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

115 lbs. x 30 – **RPE 8-9**

115 lbs. x 30 – **RPE 8-9**

115 lbs. x 30 – **RPE 8-9**

5/ Biceps | Slight incline hammer dumbbell curls

You are going to do 1 warm up set first. Each set will be doing 10 full reps, and then 5 slow partials out of the bottom.

Do 3 sets like this. **Reduce your rest period by 15 more seconds on these this week. 3 total work sets**

Rest Period – 1 minute and 30 seconds between work sets

This is an example of what it could look like:

20 lbs. x 15 – Warm up

30 lbs. x 10, then 5 partials – **RPE 12**

30 lbs. x 10, then 5 partials – **RPE 12**

30 lbs. x 10, then 5 partials – **RPE 12**

6/ Biceps | Preacher curls

Do 3 working sets close to failure shooting for about 8 reps. Use slow and controlled form. **Reduce your rest period by 15 seconds on these this week. 3 total work sets**

Rest Period – 1 minute and 30 seconds between work sets

This is an example of what it could look like:

55 lbs. x 8 – **RPE 9-10**

55 lbs. x 8 – **RPE 9-10**

55 lbs. x 8 – **RPE 9-10**

Day 4 – Lower body focus

Abs	1 exercise	3 sets
Legs	5 exercises	13 sets
Speed pulls	1 exercise	15 sets (these are all dynamic speed sets)
Calves	1 exercise	4 sets
8 exercises		35 sets

Warm up rotation

1. Hanging Leg Raises - 6-10 reps
2. Plank – 15 seconds
3. Band Pull Apart with long micro mini band – 15 reps

Do 3 rounds here.

1/ Legs | Seated leg curls

We are adding more weight on these as your progression this week. 10 lbs. added would be great. You will do 3-4 warm up sets and then do hard sets of 10 reps.

4 total work sets

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

50 x 15 – Warm up
 70 x 12 – Warm up
 90 x 6 – Feeder set
 140 x 10 – **RPE 9**
 140 x 10 – **RPE 9**
 140 x 10 – **RPE 9**
 140 x 10 – **RPE 9**

2/ Legs | Max effort barbell squats

You will be working up to a tough set of 3 with perfect form. You will follow that up with 3 sets of 5 with 70%, 75%, and 80% of your 1 rep squat max. The final set is now at 80%. Notice the holds again on the first and last reps in the example below. Use a medium stance and go a little deeper than the box squats you did on Day 1. **3 total work sets**

Rest Period – 3 minutes between work sets

Work set % – 70%, 75% and 80% on last 3 sets

This is an example of what it could look like:

135 x 10 – Warm up

185 x 8 – Warm up

225 x 4 – Feeder set

275 x 4 – Feeder set

315 x 3 – **RPE 8**

275 x 5 – 70% of 1 rep maximum squat (Hold the first and last rep for a two count at the top)

285 x 5 – 75% of 1 rep maximum squat (Hold the first and last rep for a two count at the top)

295 x 5 – 80% of 1 rep maximum squat (Hold the first and last rep for a two count at the top)

3/ Speed pulls

You are going to be using 65% of your 1 rep maximum deadlift to do 15 singles. **This is 5% more weight than last week, and you must keep your speed. 15 total work sets**

For work sets use 60% of your 1 rep maximum deadlift

Rest Period – 10 seconds between work sets

Work set % – 65%

This is an example of what it could look like:

135 x 3 – Warm up

185 x 3 – Warm up

225 x 3 – Feeder set

295 for 15 x 1 – This assumes 295 is 65% of your 1 rep max.

4/ Legs | Hack squat

Use the foot placement that allows you to use the most range of motion safely. You are going to work up to a hard set of 8 for your first set. On your next set, you are doing a cluster set. **2 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

1 plate per side x 6 – Feeder to get feel of movement

2 plates per side x 4 – Feeder set

3 plates per side x 8 – **RPE 8**

3 plates per side x 8, rest 20 seconds and then go very close to failure, rest 20 seconds and then go right up to failure – **RPE 13**

5/ Legs | Bulgarian drop set of death

Do 3 sets of 5 working your way up with dumbbells. These are meant to be easy, and not brutal. However, the work set will be brutal. You will use the dumbbells that you used working up for a drop set. Each set will involve 8 reps ending with an 8 second isohold then dropping the weight. Make sure you rest 3 minutes before doing the 2nd leg. You will need the break. Do not rush straight into the 2nd leg.

1 total work set

Rest Period – Rest 3 minutes and then do other leg.

This is an example of what it could look like:

20 lbs. x 5 – Feeder set

30 lbs. x 5 – Feeder set

40 lbs. x 5 – Feeder set

50 lbs. x 8 and then an 8 second isohold near the top, then drop to 40 lbs. x 8 and an 8 second isohold, then drop to 30 lbs. and repeat, and finally 20 lbs. to finish. Many people cannot complete this and do bodyweight only at the end. Let's see how you do. – **RPE 13**

6/ Legs | Barbell stiff legged deadlifts

Do these nice and slow. Do 3 sets of 8. **Try to increase your weight by 10 more lbs. on these this week.**

3 total work sets

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

135 x 4 – Feeder set

205 x 8 – **RPE 8**

205 x 8 – **RPE 8**

205 x 8 – **RPE 8**

7/ Calves | Seated calf raises

Do 4 sets of 15 here. **Try to add 10 lbs. on all your sets here.** Work the stretch hard at the bottom. Don't forget to do your tibialis work in between sets. **4 total work sets**

Rest Period – 1 minute between work sets

This is an example of what it could look like:

75 lbs. x 10 – Warm up

125 x 5 – Feeder set

145 x 15 – **RPE 9-10**

145 x 15 – **RPE 9-10**

145 x 15 – **RPE 9-10**

145 x 15 – **RPE 9-10**

8/ Abs | Sit ups

I'd like to see 3 sets of 12 if possible. If this is not possible, just do what you can. If this is too easy, then do 3 sets of 15-20. **3 total work sets**

Goal – Progress weekly on these by adding 1 rep per set.

Rest Period – 1 minute between work sets

RPE 8-10

This is an example of what it could look like:

Week 1 – 3 x 10 (30 total reps)

Week 2 – 3 x 11 (33 total reps)

Week 3 – 3 x 12 (36 total reps)

Week 4 – 3 x 13 (39 total reps)

Week 5 – 3 x 14 (42 total reps)

Week 6 – 3 x 15 (45 total reps)

Week 7 – We will rotate out exercis

Day 5 – Upper body push focus

Chest	4 exercises	10 sets
Shoulders	2 exercises	6 sets
Triceps	2 exercises	7 sets
8 exercises		23 sets

Warm up rotation

1. Hanging Leg Raises – 6-10 reps
2. Plank – 15 seconds
3. Band Pull Apart with long micro mini band – 15 reps

Do 3 rounds here.

1/ Chest | Slight decline dumbbell press

Do a few warm ups, then low rep feeder sets until you get to your big set. Do about 10 reps there. **That's 2 more than you did last week.** We'll then do a 2nd all out set there where you try to match the number, and then drop the weight 30% and go to failure again. **2 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

25's x 20 – Warm up
 45's x 15 – Warm up
 65's x 6 – Feeder set
 85's x 6 – Feeder set
 105's x 4 – Feeder set
 125's x 10 – **RPE 9**
 125's x 10, Dropped to 90 and go to failure – **RPE 12**

2/ Chest | Max effort medium grip high incline benches

Work up to a hard set of 3 here with perfect form. **The goal is to again beat what you did last week by 10 lbs.** You will then follow that up with 2 sets of 6 (last week you did 4) with 80% of your 1 rep maximum. Lower the weight on these with a 3 count. **3 total work sets**

Rest Period – 2 minutes between work set

Work set % – 80% on last 2 sets

This is an example of what it could look like:

135 x 10 – Warm up
 135 x 10 – Warm up
 185 x 4 – Feeder set
 225 x 3 – **RPE 9**. (Hold the first and last rep for a two count)
 200 x 6 - This assumes 200 is 80% of your 1 rep max. (Hold the first and last rep for a two count at the top)
 200 x 6 - This assumes 200 is 80% of your 1 rep max. (Hold the first and last rep for a two count at the top)

3/ Chest | Slight incline dumbbell press

Do a few low rep feeder sets until you get to your big set. Do about 8 reps there. We'll then do a 2nd all out set there where you try to match the number, and then drop the weight 30% and go to failure again. **2 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

45's x 4 – Feeder set

65's x 4 – Feeder set

85's x 8 – **RPE 9**

85's x 8. Drop to 60's and go to failure – **RPE 12**

4/ Chest | Dips

Shoot for 3 sets of around 8 to 10 reps. If you can do more than that, simply add weight. If you can't do that, use an assist machine. **3 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

Bodyweight plus added weight via dip belt or hanging chain around neck x 8 – **RPE 10**

Bodyweight plus added weight via dip belt or hanging chain around neck x 8 – **RPE 10**

Bodyweight plus added weight via dip belt or hanging chain around neck x 8 – **RPE 10**

5/ Shoulders | Dumbbell heavy side lateral partials/swings

Do 1 warm up set here before doing your heavy sets. Do 3 hard sets of 20 reps here. **Try to use 5 more lbs. than you did last week and still get the reps. 3 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

25 lbs. x 15 – Warm up

45 lbs. x 20 – **RPE 9**

45 lbs. x 20 – **RPE 9**

45 lbs. x 20 – **RPE 9**

6/ Shoulders | Machine rear delt flyes

Do 3 sets of 10 here today. We are bringing the reps down even more from earlier in the week to use a little more weight. Use a 2 second hold and flex in the contracted position on these. **3 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

140 lbs. x 10 – **RPE 8-9**

140 lbs. x 10 – **RPE 8-9**

140 lbs. x 10 – **RPE 8-9**

7/ Triceps | Kettlebell Tate press

Do 4 sets of 12 here reaching failure. **Try again to use 5 more lbs. here, even 2.5's would be good!** If you do not have kettlebells you can use dumbbells. **4 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

35 lbs. x 12 – **RPE 9-10**

35 lbs. x 12 – **RPE 9-10**

35 lbs. x 12 – **RPE 9-10**

35 lbs. x 12 – **RPE 9-10**

8/ Triceps | Dumbbell lying extensions

Use a slow tempo and absolutely perfect form on these. Do these lying on the floor and pause each rep at the bottom. **Do 3 sets of 12 using the same weight you used last week (you did 10 reps last week). 3 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

30's x 12 – **RPE 9**

30's x 12 – **RPE 9**

30's x 12 – **RPE 9**

DAYS 6 & 7

OFF - FAMILY DAY

Recover hard. Come back ready to move weight.

BLOCK 2 OF 3

WEEK 4

Execute the work. Track the loads. Recover hard.

WEEK 4.

Day 1 – Lower body focus

Abs	1 exercise	3 sets
Legs	3 exercises	10 sets (6 of these are dynamic speed sets)
Low back	1 exercise	3 sets
Calves	1 exercise	3 sets
6 exercises		19 sets

Day 2 – Upper body push focus

Chest	2 exercises	8 sets (6 of these are dynamic speed sets)
Shoulders	3 exercises	9 sets
Triceps	2 exercises	8 sets
7 exercises		25 sets

Day 3 – Upper body pull focus

Back	3 exercises	9 sets
Rear delts	1 exercise	3 sets
Biceps	2 exercises	6 sets
6 exercises		18 sets

Day 4 – Lower body focus

Abs	1 exercise	3 sets
Legs	4 exercises	12 sets
Speed pulls	1 exercise	15 sets (these are all dynamic speed sets)
Spinal erectors	1 exercise	3 sets
Calves	1 exercise	4 sets
8 exercises		27 sets

Day 5 – Upper body push focus

Chest	4 exercises	11 sets
Shoulders	2 exercises	6 sets
Triceps	2 exercises	8 sets
8 exercises		25 sets

Days 6 & 7 - OFF - Family Days

Day 1 – Lower body focus

Abs	1 exercise	3 sets
Legs	3 exercises	10 sets (6 of these are dynamic speed sets)
Low back	1 exercise	3 sets
Calves	1 exercise	3 sets
6 exercises		19 sets

Warm up rotation

1. Hanging Leg Raises – 6-10 reps
2. Plank – 15 seconds
3. Band Pull Apart with long micro mini band – 15 reps

Do 3 rounds here.

1/ Legs | Seated leg curls

During this phase we are going to continue to go hard on leg curls. You will do 3-4 warm up sets to start. You will then do a hard set of 10. For your next set, you will do the same weight, but make it a cluster set. So, it will be 8 reps, rest 20 seconds and do as many as you can, then rest 20 seconds and do as many as you can again. **2 total work sets**

Rest Period – 2 minutes between sets

This is an example of what it could look like:

50 x 15 – Warm up set

70 x 12 – Warm up set

90 x 6 – Feeder set

120 x 10 – **RPE 9**

120x 8, rest 20 seconds and then go very close to failure, rest 20 seconds and then go right up to failure – **RPE 11**

2/ Legs | Dynamic squats

These squats will still feel a bit light even with the increase in the % of your 1 rep max you are using. In this training block, the % you are using will go up weekly. The number of work sets will not. Make sure to keep the rest periods at 120 sec. Do 6 sets of 5 here. **6 total work sets**

For work sets use 65% of your 1 rep maximum squat.

Rest Period – 2 minutes between sets

Work set % – 65%

This is an example of what it could look like:

135 x 10 – Warm up

185 x 8 – Warm up

225 x 4 – Feeder set

285 for 6 x 5 – This assumes 285 is 65% of your 1 rep max.

3/ Legs | Leg press

Use a wide stance with your feet high on the platform this phase. Turn your toes slightly out. This is going to hit adductors in addition to your quads. Do a few warm up sets then 2 tough sets of 10 here with a 3 second decent on all reps.

2 total work sets

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

2 plates per side x 6 – Feeder set

3 plates per side x 6 – Feeder set

4 plates per side x 10 – **RPE 8**

4 plates per side x 10 – **RPE 8**

4/ Low back | Dumbbell hyperextensions

We are going to replace the barbell with a dumbbell here and bump the reps up. Hold the dumbbell against your chest. Do 3 sets of 15. **3 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

Bodyweight x 10 – Warm up

50 lb. dumbbell x 15 – **RPE 8**

50 lb. dumbbell x 15 – **RPE 8**

50 lb. dumbbell x 15 – **RPE 8**

5/ Abs | Decline leg raise

We would like to see 3 sets of 13 if possible. If this is not possible, just do what you can. If this is too easy, then do 3 sets of 15-20. **3 total work sets**

Goal – Progress weekly on these by adding 1 rep per set.

Rest Period – 1 minute between work sets

RPE 8-10

This is an example of what it could look like:

Week 1 – 3 x 10 (30 total reps)

Week 2 – 3 x 11 (33 total reps)

Week 3 – 3 x 12 (36 total reps)

Week 4 – 3 x 13 (39 total reps)

Week 5 – 3 x 14 (42 total reps)

Week 6 – 3 x 15 (45 total reps)

Week 7 – We will rotate out this exercise

6/ Calves | Standing calf raises

Do 3 heavy sets of 8 here. On each set add in 10 slow partials out of the bottom. Work the stretch hard at the bottom. **3 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

75 lbs. x 10 – Warm up

125 x 5 – Feeder set

175 x 8 then 10 partials – **RPE 11**

175 x 8 then 10 partials – **RPE 11**

175 x 8 then 10 partials – **RPE 11**

Day 2 – Upper body push focus

Chest	2 exercises	8 sets (6 of these are dynamic speed sets)
Shoulders	3 exercises	9 sets
Triceps	2 exercise	8 sets
7 exercises		25 sets

Warm up rotation

1. Hanging Leg Raises – 6-10 reps
2. Plank – 15 seconds
3. Band Pull Apart with long micro mini band – 15 reps

Do 3 rounds here.

1/ Chest | Dynamic benches

As with your squats, continue to focus on speed and producing maximum force here. These benches will still feel a bit light even with the increase in the % of your 1 rep max you are using. In this training block, the % you are using will go up weekly. Make sure to keep the rest periods at 120 sec. Do 6 sets of 5 here. The first 2 sets are with a grip one finger away from the smooth part of the bar. The next 2 sets are where your pinky will be on the ring. The last 2 sets your forefinger will be on the ring. Do 6 sets of 5 here. **6 total work sets**

For work sets use 65% of max weight.

Rest Period – 120 seconds between work sets

Work set % – 65%

This is an example of what it could look like:

135 x 10 – Warm up
 135 x 10 – Warm up
 185 x 4 – Feeder set
 225 for 6 x 5 – This assumes 225 is 65% of your 1 rep max.

2/ Chest | Slight incline dumbbell press

Do a few warm ups, then low rep feeder sets until you get to your big set. Do about 8 reps there. We'll then do a 2nd all out set there where you try to match the number, and then drop the weight 30% and go to failure. **2 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

45's x 15 – Warm up
 65's x 4 – Feeder set
 85's x 8 – **RPE 9**
 85's x 8. Drop to 60's and go to failure – **RPE 12**

3/ Shoulders | High incline Smith press

We want a tough set of 8 then 5. Lastly, we are adding a heavy set of 3 here during this phase. On all 3 work sets keep a slow and controlled tempo. This allows you to go heavy and use lower reps, without getting injured. Also, before your first rep, and after you complete the last rep do your 2 second hold. **3 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

95 x 3 – Feeder set

205 x 4 – Feeder set

135 x 8 (slow tempo) – **RPE 8** (Hold the first and last rep for a two count)

155 x 5 (slow tempo) – **RPE 9** (Hold the first and last rep for a two count)

175 x 3 (slow tempo) – **RPE 9** (Hold the first and last rep for a two count)

4/ Shoulders | Dumbbell side laterals

These are just standard dumbbell side laterals. Do 2 sets of 10, and then on your last set do a massive drop set. Do 10, drop the weight and shoot for another 10, then drop the weight and shoot for another 10. **3 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

30's x 10 – **RPE 9**

30's x 10 – **RPE 9**

30's x 10, then drop to 20's and do 10, then drop to 10's and do 10 – **RPE 12**

5/ Shoulders | Overhead plate raises

Raise the plate up to directly over your head. Do 3 sets of 10 here. Use the setup notes to see the proper form. These are great for delts but are also meant to hit your lower traps. **3 total work sets**

This is an example of what it could look like:

25 lb. plate x 10 – **RPE 9**

25 lb. plate x 10 – **RPE 9**

25 lb. plate x 10 – **RPE 9**

6/ Triceps | Single arm triceps extensions

This is a great cable exercise for triceps. We like for these to be done for higher reps. Do 4 sets of 20 here. **4 total work sets**

Rest Period – 2 minutes between work sets

50 lbs. x 20 – **RPE 9**

50 lbs. x 20 – **RPE 9**

50 lbs. x 20 – **RPE 9**

50 lbs. x 20 – **RPE 9**

7/ Triceps | Tricep pushdowns with dual handles

Use two attachments and keep the setup controlled. We prefer something with a spongy grip. Drive the weight straight down and flex your triceps hard. Do 4 hard sets of 8 here.

4 total work sets

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

150 lbs. x 8 – **RPE 9**

150 lbs. x 8 – **RPE 9**

150 lbs. x 8 – **RPE 9**

150 lbs. x 8 – **RPE 9**

Day 3 – Upper body pull focus

Back	3 exercises	9 sets
Rear delts	1 exercise	3 sets
Biceps	2 exercises	6 sets
6 exercises		18 sets

1/ Back | Chest supported row

Use a machine that has a chest pad so you can eliminate lower back stress. Use a neutral grip on these during this block (palms facing each other). These are meant to target your lats a little more in addition to traps, and rhomboids. Do 3 sets of 8 here. Use a full range of motion really stretching out in the lengthened position. Even with a neutral grip you will feel your rhomboids stretching.

3 total work sets

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

50 lbs. x 15 – Warm up
 50 lbs. x 10 – Warm up
 90 lbs. x 4 – Feeder set
 140 lbs. x 8 – **RPE 9**
 140 lbs. x 8 – **RPE 9**
 140 lbs. x 8 – **RPE 9**

2/ Back | Meadows row

The goal here is to work your upper back hard in addition to your lats. Do two low rep feeder sets to get you to your working weight. Do two hard sets of 10 to start. Next up is your money set. Do around 10, where 10 is failure. If you do 9 or 11, that's ok, we just need that last rep to be failure with good form. If you get 12 or more, you didn't go heavy enough. After you do your 10, drop the weight 25-30% and grind out as many more reps as you can. Treat your arms as simple attachments, do not pull with your biceps.

3 total work sets

***It is ok if you lose a few reps on these, as fatigue may start to set in.**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

50 x 5 – Feeder set
 75 x 5 – Feeder set
 100 x 10 – **RPE 10**
 100 x 10 – **RPE 10**
 100 x 10, then 75 x 10 – **RPE 12**

3/ Back | Stretch pulldowns

Do 3 sets of 8 here. You can pick either version from the setup notes. Whichever version you pick, stick with it throughout the block. 3 total work sets

This is an example of what it could look like:

170 lbs. x 8 – **RPE 9**

170 lbs. x 8 – **RPE 9**

170 lbs. x 8 – **RPE 9**

4/ Rear delts | Machine rear delt flyes

Do 3 sets of 15 here. After each set add on 10 partials out of the stretch position. **3 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

125 lbs. x 15, then 10 partials – **RPE 12**

125 lbs. x 15, then 10 partials – **RPE 12**

125 lbs. x 15, then 10 partials – **RPE 12**

5/ Biceps | Standing hammer dumbbell curls

You are going to do 1 warm up set first. Do 3 sets of 12 here followed by 3 slow partials out of the bottom.

3 total work sets

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

20 lbs. x 15 – Warm up

30 lbs. x 12, then 3 partials – **RPE 12**

30 lbs. x 12, then 3 partials – **RPE 12**

30 lbs. x 12, then 3 partials – **RPE 12**

6/ Biceps | Concentration preacher curls

Do 2 working sets close to failure shooting for about 10 reps. Do a 3rd set where you add in one drop. Use slow and controlled form. **3 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

30's x 10 – **RPE 9**

30's x 10 – **RPE 9**

30's x 10, then drop to 15's and do 10 – **RPE 12**

Day 4 – Lower body focus

Abs	1 exercise	3 sets
Legs	4 exercises	12 sets
Speed pulls	1 exercise	15 sets (these are all dynamic speed sets)
Spinal erectors	1 exercise	3 sets
Calves	1 exercise	4 sets
8 exercises		37 sets

Warm up rotation

1. Hanging Leg Raises – 6-10 reps
2. Plank – 15 seconds
3. Band Pull Apart with long micro mini band – 15 reps

Do 3 rounds here.

1/ Legs | Lying leg curls

Do 3-4 warm up sets and then do 3 hard sets of 8 reps. Try to lower the weight with a 3 count on all reps.

3 total work sets

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

50 x 15 – Warm up
 70 x 12 – Warm up
 90 x 6 – Feeder set
 130 x 8 – **RPE 9**
 130 x 8 – **RPE 9**
 130 x 8 – **RPE 9**

2/ Legs | Max effort front squats

We want you to get great depth on these. Use something like a 5 lb. plate under your heels to help facilitate this. Do not use a large plate and raise your heels too much or you will create excessive knee stress. You can use Prime wedges if your knees are ok with those. You will probably not know your 1 rep max here, so we will not be using a %. You will be working based on RPE. Do 3 sets of 5 increasing weight as you go. See the example below. We will use the 2 seconds holds here as well. This just means stand tall and hold the weight for 2 seconds before first rep and after you complete the last rep. **3 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

135 x 10 – Warm up
 185 x 8 – Warm up
 225 x 3 – Feeder set
 255 x 5 – **RPE 7** (Hold the first and last rep for a two count)
 265 x 5 – **RPE 8** (Hold the first and last rep for a two count)
 275 x 5 – **RPE 9** (Hold the first and last rep for a two count)

3/ Modified speed pulls (trap bar)

We want you to change how you pull in this block. Ideally this now becomes a Trap bar deadlift. That is our #1 option for you. If you do not have access to a trap bar, you will do block pulls. You would then elevate the plates on small blocks (you can use anything to raise the weight up a few inches). You are going to be using 55% of your 1 rep maximum deadlift to do 15 singles. Since this variation may be new for you, just try to best guesstimate your max. It should not be too far off from the standard pull. **15 total work sets**

For work sets use 55% of your 1 rep maximum deadlift

Rest Period – 10 seconds between work sets

Work set % – 55%

This is an example of what it could look like:

135 x 3 – Warm up
 185 x 3 – Warm up
 225 x 3 – Feeder set
 275 for 15 x 1 – This assumes 275 is 55% of your 1 rep max.

4/ Spinal erectors | Zercher carry

Our goal here is for you to work your lower traps and upper spinal erectors. We love doing these carries with a Yolk but realize that most gyms will not have this piece of equipment. Watch the setup notes on how to do these. You have the option of doing these with a barbell or dumbbell. Either way works fine. On each set, make sure you take 20 total steps. Do 3 sets. **3 total work sets**

This is an example of what it could look like:

135 lbs. (barbell) x 20 steps – **RPE 7**
 135 lbs. (barbell) x 20 steps – **RPE 7**
 135 lbs. (barbell) x 20 steps – **RPE 7**

Or

100 lb. dumbbell x 20 steps – **RPE 7**
 100 lb. dumbbell x 20 steps – **RPE 7**
 100 lb. dumbbell x 20 steps – **RPE 7**

5/ Legs | Leg extensions

Do a couple feeder sets to find the right weight and then do 3 sets of 10 here. On the last set add on an additional 10 partials out of the bottom. **3 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

135 x 5 – Feeder set
 155 x 3 – Feeder set
 185 x 10 – **RPE 9**
 185 x 10 – **RPE 9**
 185 x 10, then 10 partials – **RPE 12**

6/ Legs | Dumbbell stiff legged deadlifts

Do these nice and slow. Do 3 slow sets of 6. **3 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

135 x 3 – Feeder set
 195 x 6 – **RPE 8**
 195 x 6 – **RPE 8**
 195 x 6 – **RPE 8**

7/ Calves | Seated calf raises

Do 4 sets of 15 here. Work the stretch hard at the bottom. Don't forget to do your tibialis work in between sets.

4 total work sets

Rest Period – 1 minute between work sets

This is an example of what it could look like:

75 lbs. x 10 – Warm up
 125 x 5 – Feeder set
 135 x 15 – **RPE 9-10**
 135 x 15 – **RPE 9-10**
 135 x 15 – **RPE 9-10**
 135 x 15 – **RPE 9-10**

8/ Abs | Sit ups

I'd like to see 3 sets of 13 if possible. If this is not possible, just do what you can. If this is too easy, then do 3 sets of 15-20. **3 total work sets**

Goal – Progress weekly on these by adding 1 rep per set.

Rest Period – 1 minute between work sets

RPE 8-10

This is an example of what it could look like:

Week 1 – 3 x 10 (30 total reps)
 Week 2 – 3 x 11 (33 total reps)
 Week 3 – 3 x 12 (36 total reps)
 Week 4 – 3 x 13 (39 total reps)
 Week 5 – 3 x 14 (42 total reps)
 Week 6 – 3 x 15 (45 total reps)
 Week 7 – We will rotate out exercis

Day 5 – Upper body push focus

Chest	4 exercises	11 sets
Shoulders	2 exercises	6 sets
Triceps	2 exercises	8 sets
8 exercises		25 sets

Warm up rotation

1. Hanging Leg Raises – 6-10 reps
2. Plank – 15 seconds
3. Band Pull Apart with long micro mini band – 15 reps

Do 3 rounds here.

1/ Chest | Machine press

Use your favorite chest pressing machine here. You will do 2 hard sets of 8 to start. On your last set do another 8, and then drop the weight 25% and shoot for another 8 reps. See the example below. **3 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

75 lbs. x 10 – Warm up
 105 lbs. x 10 – Warm up
 135 x 5 – Feeder set
 155 x 8 – **RPE 9**
 155 x 8 – **RPE 9**
 155 x 8, then 115 for another 8 – **RPE 12**

2/ Chest | Max effort floor presses with straight legs

Today is a maximal strength bench day. There continues to be a really heavy emphasis on shoulders and triceps here. You are going to work up to a set of 3 here with perfect form. You will then follow that up with 2 sets of 2 with 80% of your 1 rep maximum done with a very slow and controlled tempo. Lower with a 3 count. **3 total work sets**

Rest Period – 2 minutes between work set

Work set % – 80% on last 2 sets

This is an example of what it could look like:

135 x 10 – Warm up
 135 x 10 – Warm up
 185 x 4 – Feeder set
 255 x 3 – **RPE 9**
 235 x 2 (slow tempo) - Assumes 235 is 80% of your 1 rep max (Hold the first and last rep for a two count)
 235 x 2 (slow tempo) - Assumes 235 is 80% of your 1 rep max (Hold the first and last rep for a two count)

3/ Chest | Pec minor dips

These are really tough. Don't be discouraged if it takes some practice. When you get it, you will experience a phenomenal pump and get sore in a very unique way. Make sure you watch the setup notes to learn the form. Do 3 sets to failure. **3 total work sets**

This is an example of what it could look like:

Bodyweight x F – **RPE 10**

Bodyweight x F – **RPE 10**

Bodyweight x F – **RPE 10**

4/ Chest | Slight decline dumbbell press

Do a few low rep feeder sets until you get to your big set. Do about 8 reps there. We'll then do a 2nd all out set there where you try to match the number, and then drop the weight 30% and go to failure again. **2 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

45's x 4

65's x 4

85's x 8 – **RPE 9**

85's x 8. Drop to 60's and get 6 more – **RPE 12**

5/ Shoulders | Dumbbell medium side lateral partials/swings

Do 1 warm up set here before doing your medium heavy sets. Do 3 hard sets of 30 reps here. On this block we are using a little less weight but doing more reps than the last block. **3 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

20 lbs. x 10 – Warm up

30 lbs. x 30 – **RPE 9**

30 lbs. x 30 – **RPE 9**

30 lbs. x 30 – **RPE 9**

6/ Shoulders | Supine cable laterals

Do 3 sets of 15 here today. Do these with a nice slow tempo as well. **3 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

25 lbs. x 15 – **RPE 8-9**

25 lbs. x 15 – **RPE 8-9**

25 lbs. x 15 – **RPE 8-9**

7/ Triceps | Seated rope extensions

If you do not have a bench to support your back as shown with back support, you can do these standing facing away from cable station. Do 4 sets of 12 here reaching failure.

4 total work sets

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

125 lbs. x 12 – **RPE 9-10**

125 lbs. x 12 – **RPE 9-10**

125 lbs. x 12 – **RPE 9-10**

125 lbs. x 12 – **RPE 9-10**

8/ Triceps | Decline lying extensions

Do these lying on a slight decline. Do 4 sets of 8.

4 total work sets

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

85 x 8 – **RPE 9**

85 x 8 – **RPE 9**

85 x 8 – **RPE 9**

85 x 8 – **RPE 9**

DAYS 6 & 7

OFF - FAMILY DAY

Recover hard. Come back ready to move weight.

BLOCK 2 OF 3

WEEK 5

Progressions are in bold. Hit the new goals with clean execution.

WEEK 5

Day 1 – Lower body focus

Abs	1 exercise	3 sets
Legs	3 exercises	10 sets (6 of these are dynamic speed sets)
Low back	1 exercise	3 sets
Calves	1 exercise	3 sets
6 exercises		19 sets

Day 2 – Upper body push focus

Chest	2 exercises	8 sets (6 of these are dynamic speed sets)
Shoulders	3 exercises	10 sets
Triceps	2 exercises	8 sets
7 exercises		26 sets

Day 3 – Upper body pull focus

Back	3 exercises	9 sets
Rear delts	1 exercise	3 sets
Biceps	2 exercises	10 sets
6 exercises		22 sets

Day 4 – Lower body focus

Abs	1 exercise	3 sets
Legs	4 exercises	13 sets
Speed pulls	1 exercise	15 sets (these are all dynamic speed sets)
Spinal erectors	1 exercise	3 sets
Calves	1 exercise	4 sets
8 exercises		38 sets

Day 5 – Upper body push focus

Chest	4 exercises	11 sets
Shoulders	2 exercises	6 sets
Triceps	2 exercises	12 sets
8 exercises		29 sets

Days 6 & 7 - OFF - Family Days

Day 1 – Lower body focus

Abs	1 exercise	3 sets
Legs	3 exercises	10 sets (6 of these are dynamic speed sets)
Low back	1 exercise	3 sets
Calves	1 exercise	3 sets
6 exercises		19 sets

Warm up rotation

1. Hanging Leg Raises – 6-10 reps
2. Plank – 15 seconds
3. Band Pull Apart with long micro mini band – 15 reps

Do 3 rounds here.

1/ Legs | Seated leg curls

You will do 3-4 warm up sets to start. You will then do a hard set of 12. **This is an extra 2 reps from what you did last week using the same weight.** For your next set, you will do the same weight, but make it a cluster set. So, it will be 10 reps, rest 20 seconds and do as many as you can, then rest 20 seconds and do as many as you can again.
2 total work sets

Rest Period – 2 minutes between sets

This is an example of what it could look like:

50 x 15 – Warm up set
 70 x 12 – Warm up set
 90 x 6 – Feeder set
 120 x 12 – **RPE 9**
 120x 10, rest 20 seconds and then go very close to failure, rest 20 seconds and then go right up to failure – **RPE 11**

2/ Legs | Dynamic squats

You will increase the percentage of your 1 rep max by 5% this week. This means using slightly heavier weight. Make sure to keep the rest periods at 120 sec. Do 6 sets of 5 here.
6 total work sets

For work sets use 70% of your 1 rep maximum squat.

Rest Period – 120 seconds between work sets

Work set % – 70%

This is an example of what it could look like:

135 x 10 – Warm up
 185 x 8 – Warm up
 225 x 4 – Feeder set
 295 for 6 x 5 – This assumes 295 is 70% of your 1 rep max.

3/ Legs | Leg press

Do a few warm up sets then 2 tough sets of 12 here with a 3 second decent on all reps. **This is 2 reps more than you got last week with the same weight. 2 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

2 plates per side x 6 – Feeder set

3 plates per side x 6 – Feeder set

4 plates per side x 12 – **RPE 8**

4 plates per side x 12 – **RPE 8**

4/ Low back | Dumbbell hyperextensions

Increase the weight of the dumbbell here by 5 lbs. over what you did last week. Do 3 sets of 15. **3 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

Bodyweight x 10 – Warm up

55 lb. dumbbell x 15 – **RPE 8**

55 lb. dumbbell x 15 – **RPE 8**

55 lb. dumbbell x 15 – **RPE 8**

5/ Abs | Decline leg raise

We would like to see 3 sets of 14 if possible. If this is not possible, just do what you can. If this is too easy, then do 3 sets of 15-20. **3 total work sets**

Goal – Progress weekly on these by adding 1 rep per set.

Rest Period – 1 minute between work sets

RPE 8-10

This is an example of what it could look like:

Week 1 – 3 x 10 (30 total reps)

Week 2 – 3 x 11 (33 total reps)

Week 3 – 3 x 12 (36 total reps)

Week 4 – 3 x 13 (39 total reps)

Week 5 – 3 x 14 (42 total reps)

Week 6 – 3 x 15 (45 total reps)

Week 7 – We will rotate out this exercise

6/ Calves | Standing calf raises

Use 10 lbs. more here this week then you used last week.

Do 3 heavy sets of 8 here. On each set add in 10 slow partials out of the bottom. Work the stretch hard at the bottom. **3 total work sets**

Reminder – In between ALL sets of calves, you will be doing tibialis anterior work. Do sets of 25.

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

75 lbs. x 10 – Warm up

125 x 5 – Feeder set

185 x 8 then 10 partials – **RPE 11**

185 x 8 then 10 partials – **RPE 11**

185 x 8 then 10 partials – **RPE 11**

Day 2 – Upper body push focus

Chest	2 exercises	8 sets (6 of these are dynamic speed sets)
Shoulders	3 exercises	10 sets
Triceps	2 exercise	8 sets
7 exercises		26 sets

Warm up rotation

1. Hanging Leg Raises – 6-10 reps
2. Plank – 15 seconds
3. Band Pull Apart with long micro mini band – 15 reps

Do 3 rounds here.

1/ Chest | Dynamic benches

You will increase the percentage of your 1 rep max by 5% this week. This means using slightly heavier weight. Make sure to keep the rest periods at 120 sec. Do 6 sets of 5 here. The first 2 sets are with a grip one finger away from the smooth part of the bar. The next 2 sets are where your pinky will be on the ring. The last 2 sets your forefinger will be on the ring. Do 6 sets of 5 here. **6 total work sets**

For work sets use 70% of max weight.

Rest Period – 120 seconds between work sets

Work set % – 70%

This is an example of what it could look like:

135 x 10 – Warm up

135 x 10 – Warm up

185 x 4 – Feeder set

235 for 6 x 5 – This assumes 225 is 70% of your 1 rep max.

2/ Chest | Slight incline dumbbell press

Do a few warm ups, then low rep feeder sets until you get to your big set. **Use 5 lbs. more than you used last week here.** Do about 8 reps there. We'll then do a 2nd all out set there where you try to match the number, and then drop the weight 30% and go to failure. **2 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

45's x 15 – Warm up

65's x 4 – Feeder set

90's x 8 – **RPE 9**

90's x 8. Drop to 65's and go to failure – **RPE 12**

3/ Shoulders | High incline Smith press

We want a tough set of 8 then 5. **We are adding a 2nd heavy set of 3 here this week.** On all 4 work sets keep a slow and controlled tempo. Before your first rep, and after you complete the last rep do your 2 second hold. **4 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

95 x 3 – Feeder set

205 x 4 – Feeder set

135 x 8 (slow tempo) – **RPE 8** (Hold the first and last rep for a two count)

155 x 5 (slow tempo) – **RPE 9** (Hold the first and last rep for a two count)

175 x 3 (slow tempo) – **RPE 9** (Hold the first and last rep for a two count)

175 x 3 (slow tempo) – **RPE 9** (Hold the first and last rep for a two count)

4/ Shoulders | Dumbbell side laterals

These are just standard dumbbell side laterals. Do 2 sets of 12, and then on your last set do a massive drop set. Do 12, drop the weight and shoot for another 12, then drop the weight and shoot for another 12. **You are adding 2 reps to what you did last week with the same weight.** **3 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

30's x 12 – **RPE 9**

30's x 12 – **RPE 9**

30's x 12, then drop to 20's and do 12, then drop to 10's and do 12 – **RPE 12**

5/ Shoulders | Overhead plate raises

Raise the plate up to directly over your head. Do 3 sets of 12 here. **You are doing 2 more reps here this week with the same weight on each set.** **3 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

25 lb. plate x 12 – **RPE 9**

25 lb. plate x 12 – **RPE 9**

25 lb. plate x 12 – **RPE 9**

6/ Triceps | Single arm triceps extensions

This is a great cable exercise for triceps. **Use slightly more weight on these this week.** **4 sets of 20 here.** **4 total work sets**

Rest Period – 2 minutes between work sets

55 lbs. x 20 – **RPE 9**

55 lbs. x 20 – **RPE 9**

55 lbs. x 20 – **RPE 9**

55 lbs. x 20 – **RPE 9**

7/ Triceps | Tricep pushdowns with dual handles

Use two attachments. We prefer something with a spongy grip. Drive the weight straight down and flex your triceps hard. **Do 4 hard sets of 10 here using the same weight you did 8 with last week. 4 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

150 lbs. x 10 – **RPE 9**

150 lbs. x 10 – **RPE 9**

150 lbs. x 10 – **RPE 9**

150 lbs. x 10 – **RPE 9**

Day 3 – Upper body pull focus

Back	3 exercises	9 sets
Rear delts	1 exercise	3 sets
Biceps	2 exercises	10 sets
6 exercises		22 sets

1/ Back | Chest supported row

Do 3 sets of 10 here using the same weight that you used for 8 last week. Use a full range of motion really stretching out in the lengthened position. Even with a neutral grip you will feel your rhomboids stretching. **3 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

50 lbs. x 15 – Warm up
 50 lbs. x 10 – Warm up
 90 lbs. x 4 – Feeder set
 140 lbs. x 10 – **RPE 9**
 140 lbs. x 10 – **RPE 9**
 140 lbs. x 10 – **RPE 9**

2/ Back | Meadows row

Do two low rep feeder sets to get you to your working weight. **Start with two hard sets of 10 using 10 lbs. more than last week.** Next up is your money set. Do around 10, where 10 is failure. If you do 9 or 11, that's ok, we just need that last rep to be failure with good form. If you get 12 or more, you didn't go heavy enough. After you do your 10, drop the weight 25-30% and grind out as many more reps as you can. Treat your arms as simple attachments, do not pull with your biceps. **3 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

50 x 5 – Feeder set
 75 x 5 – Feeder set
 110 x 10 – **RPE 10**
 110 x 10 – **RPE 10**
 110 x 10, then 85 x 10 – **RPE 12**

3/ Back | Stretch pulldowns

Do 3 sets of 10 here using the same weight you used last week for 8. Whichever version you pick, stick with it throughout the block. **3 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

170 lbs. x 10 – **RPE 9**
 170 lbs. x 10 – **RPE 9**
 170 lbs. x 10 – **RPE 9**

4/ Rear delts | Machine rear delt flyes

Do 3 sets of 20 here using the weight you used last week for 15. You will not do partials this week. **3 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

115 lbs. x 20 – **RPE 9**

115 lbs. x 20 – **RPE 9**

115 lbs. x 20 – **RPE 9**

5/ Biceps | Standing hammer dumbbell curls

You are going to do 1 warm up set first. You are adding two work sets this week. Do 5 sets of 12 here. Drop the partials this week. **5 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

20 lbs. x 15 – Warm up

30 lbs. x 12 – **RPE 10**

30 lbs. x 12 – **RPE 10**

30 lbs. x 12 – **RPE 10**

30 lbs. x 12 – **RPE 10**

30 lbs. x 12 – **RPE 10**

6/ Biceps | Concentration preacher curls

You are adding two work sets this week. Do 5 working sets close to failure shooting for about 10 reps. There will be no drop set this week. Use slow and controlled form. **5 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

30's x 10 – **RPE 9**

30's x 10 – **RPE 9**

30's x 10 – **RPE 9**

30's x 10 – **RPE 9**

30's x 10 – **RPE 9**

Day 4 – Lower body focus

Abs	1 exercise	3 sets
Legs	4 exercises	13 sets
Speed pulls	1 exercise	15 sets (these are all dynamic speed sets)
Spinal erectors	1 exercise	3 sets
Calves	1 exercise	4 sets
8 exercises		38 sets

Warm up rotation

1. Hanging Leg Raises – 6-10 reps
2. Plank – 15 seconds
3. Band Pull Apart with long micro mini band – 15 reps

Do 3 rounds here.

1/ Legs | Lying leg curls

Do 3-4 warm up sets and then do 4 hard sets of 8 reps. **You are adding one work set this week.** Try to lower the weight with a 3 count on all reps. **4 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

50 x 15 – Warm up
 70 x 12 – Warm up
 90 x 6 – Feeder set
 130 x 8 – **RPE 9**
 130 x 8 – **RPE 9**
 130 x 8 – **RPE 9**
 130 x 8 – **RPE 9**

2/ Legs | Max effort front squats

Do 3 sets of 5 increasing weight as you go. See the example below though for the progression. **You are starting at what you did in your 2nd set last week, then going higher on your next two sets.** We will use the 2 seconds holds here as well. **3 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

135 x 10 – Warm up
 185 x 8 – Warm up
 225 x 3 – Feeder set
 265 x 5 – **RPE 7** (Hold the first and last rep for a two count at the top)
 275 x 5 – **RPE 8** (Hold the first and last rep for a two count at the top)
 285 x 5 – **RPE 9** (Hold the first and last rep for a two count at the top)

3/ Modified speed pulls (trap bar)

You are going to be using 60% of your 1 rep maximum deadlift this week as opposed to the 55% you used last week. 15 total work sets

For work sets use 60% of your 1 rep maximum deadlift

Rest Period – 10 seconds between work sets

Work set % – 60%

This is an example of what it could look like:

135 x 3 – Warm up

185 x 3 – Warm up

225 x 3 – Feeder set

285 for 15 x 1 – This assumes 285 is 60% of your 1 rep max.

4/ Spinal erectors | Zercher carry

On each set, make sure you take 24 total steps. **This is an extra 2 steps with each leg this week.** Do 3 sets.

3 total work sets

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

135 lbs. (barbell) x 24 steps – **RPE 7**

135 lbs. (barbell) x 24 steps – **RPE 7**

135 lbs. (barbell) x 24 steps – **RPE 7**

Or

100 lb. dumbbell x 24 steps – **RPE 7**

100 lb. dumbbell x 24 steps – **RPE 7**

100 lb. dumbbell x 24 steps – **RPE 7**

5/ Legs | Leg extensions

Do a couple feeder sets to find the right weight and then do 3 sets of 10 here. On the last set add on an additional 15 partials out of the bottom. **This is 5 more partials this week.** This will involve even more pain. Work through it.

3 total work sets

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

135 x 5 – Feeder set

155 x 3 – Feeder set

185 x 10 – **RPE 9**

185 x 10 – **RPE 9**

185 x 10, then 15 partials – **RPE 12**

6/ Legs | Dumbbell stiff legged deadlifts

Do these nice and slow with a small amount of extra weight. Do 3 slow sets of 6. 3 total work sets

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

135 x 3 – Feeder set

200 x 6 – **RPE 8**

200 x 6 – **RPE 8**

200 x 6 – **RPE 8**

7/ Calves | Seated calf raises

Do 4 sets of 15 here. **Use 10 more lbs. this week.** Work the stretch hard at the bottom. Don't forget to do your tibialis work in between sets. **4 total work sets**

Rest Period – 1 minute between work sets

This is an example of what it could look like:

75 lbs. x 10 – Warm up

125 x 5 – Feeder set

145 x 15 – **RPE 9-10**

145 x 15 – **RPE 9-10**

145 x 15 – **RPE 9-10**

145 x 15 – **RPE 9-10**

8/ Abs | Sit ups

We'd like to see 3 sets of 14 if possible. If this is not possible, just do what you can. If this is too easy, then do 3 sets of 15-20. **3 total work sets**

Goal – Progress weekly on these by adding 1 rep per set.

Rest Period – 1 minute between work sets

RPE 8-10

This is an example of what it could look like:

Week 1 – 3 x 10 (30 total reps)

Week 2 – 3 x 11 (33 total reps)

Week 3 – 3 x 12 (36 total reps)

Week 4 – 3 x 13 (39 total reps)

Week 5 – 3 x 14 (42 total reps)

Week 6 – 3 x 15 (45 total reps)

Week 7 – We will rotate out exercis

Day 5 – Upper body push focus

Chest	4 exercises	11 sets
Shoulders	2 exercises	6 sets
Triceps	2 exercises	12 sets
8 exercises		29 sets

Warm up rotation

1. Hanging Leg Raises – 6-10 reps
2. Plank – 15 seconds
3. Band Pull Apart with long micro mini band – 15 reps

Do 3 rounds here.

1/ Chest | Machine press

Use your favorite chest pressing machine here. You will do 2 hard sets of 8 to start. On your last set do another 8, and then drop the weight 25% and shoot for another 8 reps. See the example below. **Use 10 more lbs. on these this week.**

3 total work sets

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

75 lbs. x 10 – Warm up

105 lbs. x 10 – Warm up

135 x 5 – Feeder set

165 x 8 – **RPE 9**

165 x 8 – **RPE 9**

165 x 8, then 125 for another 8 – **RPE 12**

2/ Chest | Max effort floor presses with straight legs

Today is a maximal strength bench day. There continues to be a really heavy emphasis on shoulders and triceps here.

You are going to work up to a set of 3 here with perfect form. You will then follow that up with 2 sets of 4 with 80% of your 1 rep maximum done with a very slow and controlled tempo. **This is 2 extra reps per set on the last two sets.** Lower with a 3 count. **3 total work sets**

Rest Period – 2 minutes between work set

Work set % – 80% on last 2 sets

This is an example of what it could look like:

135 x 10 – Warm up

135 x 10 – Warm up

185 x 4 – Feeder set

255 x 3 – **RPE 9**

235 x 4 (slow tempo) – Assumes 235 is 80% of your 1 rep max (Hold the first and last rep for a two count)

235 x 4 (slow tempo) – Assumes 235 is 80% of your 1 rep max (Hold the first and last rep for a two count)

3/ Chest | Pec minor dips

Do 3 sets to failure. **3 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

Bodyweight x F – **RPE 10**

Bodyweight x F – **RPE 10**

Bodyweight x F – **RPE 10**

4/ Chest | Slight decline dumbbell press

Do a few low rep feeder sets until you get to your big set. Do about 8 reps there. We'll then do a 2nd all out set there where you try to match the number, and then drop the weight 30% and go to failure again. **Go up 5 lbs. this week on the work sets. 2 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

45's x 4

65's x 4

90's x 8 – **RPE 9**

90's x 8. Drop to 65's and get 6 more – **RPE 12**

5/ Shoulders | Dumbbell medium side lateral partials/swings

Do 1 warm up set here before doing your medium heavy sets. Do 3 hard sets of 35 reps here. This is 5 more reps than last week, and you will feel every rep. **3 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

20 lbs. x 10 – Warm up

30 lbs. x 35 – **RPE 9**

30 lbs. x 35 – **RPE 9**

30 lbs. x 35 – **RPE 9**

6/ Shoulders | Supine cable laterals

Do 3 sets of 17 here today. **Squeeze out 2 more reps with the same weight this week.** Do these with a nice slow tempo as well. **3 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

25 lbs. x 17 – **RPE 8-9**

25 lbs. x 17 – **RPE 8-9**

25 lbs. x 17 – **RPE 8-9**

7/ Triceps | Seated rope extensions

If you do not have a bench to support your back you can do these standing facing away from cable station. Do 6 sets of 12 here reaching failure. This is two extra sets. **6 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

125 lbs. x 12 – **RPE 9-10**

125 lbs. x 12 – **RPE 9-10**

125 lbs. x 12 – **RPE 9-10**

125 lbs. x 12 – **RPE 9-10**

125 lbs. x 12 – **RPE 9-10**

125 lbs. x 12 – **RPE 9-10**

8/ Triceps | Decline lying extensions

Do these lying on a slight decline. Do 6 sets of 8. **This is two extra sets. 6 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

85 x 8 – **RPE 9**

85 x 8 – **RPE 9**

85 x 8 – **RPE 9**

85 x 8 – **RPE 9**

85 x 8 – **RPE 9**

85 x 8 – **RPE 9**

DAYS 6 & 7

OFF - FAMILY DAY

Recover hard. Come back ready to move weight.

BLOCK 2 OF 3

WEEK 6

Progressions are in bold. Hit the new goals with clean execution.

WEEK 6

Day 1 – Lower body focus

Abs	1 exercise	3 sets
Legs	3 exercises	12 sets (6 of these are dynamic speed sets)
Low back	1 exercise	3 sets
Calves	1 exercise	4 sets
6 exercises		22 sets

Day 2 – Upper body push focus

Chest	2 exercises	8 sets (6 of these are dynamic speed sets)
Shoulders	3 exercises	10 sets
Triceps	2 exercises	12 sets
7 exercises		30 sets

Day 3 – Upper body pull focus

Back	3 exercises	10 sets
Rear delts	1 exercise	4 sets
Biceps	2 exercises	12 sets
6 exercises		26 sets

Day 4 – Lower body focus

Abs	1 exercise	3 sets
Legs	4 exercises	13 sets
Speed pulls	1 exercise	15 sets (these are all dynamic speed sets)
Spinal erectors	1 exercise	3 sets
Calves	1 exercise	4 sets
8 exercises		38 sets

Day 5 – Upper body push focus

Chest	4 exercises	11 sets
Shoulders	2 exercises	6 sets
Triceps	2 exercises	14 sets
8 exercises		31 sets

Days 6 & 7 - OFF - Family Days

Day 1 – Lower body focus

Abs	1 exercise	3 sets
Legs	3 exercises	12 sets (6 of these are dynamic speed sets)
Low back	1 exercise	3 sets
Calves	1 exercise	4 sets
6 exercises		22 sets

Warm up rotation

1. Hanging Leg Raises – 6-10 reps
2. Plank – 15 seconds
3. Band Pull Apart with long micro mini band – 15 reps

Do 3 rounds here.

1/ Legs | Seated leg curls

You will do 3-4 warm up sets to start. You are adding a work set this week. Last week it was 2 sets, this week it is 3. Start with 2 sets of 12. For your last set, you will do the same weight, but make it a cluster set. So, it will be 10 reps, rest 20 seconds and do as many as you can, then rest 20 seconds and do as many as you can again. **3 total work sets**

Rest Period – 2 minutes between sets

This is an example of what it could look like:

50 x 15 – Warm up set

70 x 12 – Warm up set

90 x 6 – Feeder set

120 x 12 – **RPE 9**

120 x 12 – **RPE 9**

120x 10, rest 20 seconds and then go very close to failure, rest 20 seconds and then go right up to failure – **RPE 11**

2/ Legs | Dynamic squats

You will increase the percentage of your 1 rep max by 5% more this week. This means using slightly heavier weight. Make sure to keep the rest periods at 120 sec. Do 6 sets of 5 here. **6 total work sets**

For work sets use 75% of your 1 rep maximum squat.

Rest Period – 120 seconds between work sets

Work set % – 75%

This is an example of what it could look like:

135 x 10 – Warm up

185 x 8 – Warm up

225 x 4 – Feeder set

305 for 6 x 5 – This assumes 305 is 75% of your 1 rep max.

3/ Legs | Leg press

Do a few warm up sets then 3 tough sets of 12 here with a 3 second decent on all reps. **This is one more work set than you did last week. 3 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

2 plates per side x 6 – Feeder set
 3 plates per side x 6 – Feeder set
 4 plates per side x 12 – **RPE 8**
 4 plates per side x 12 – **RPE 8**
 4 plates per side x 12 – **RPE 8**

4/ Low back | Dumbbell hyperextensions

Increase the weight of the dumbbell here by 5 lbs. over what you did last week. Do 3 sets of 15. **3 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

Bodyweight x 10 – Warm up
 60 lb. dumbbell x 15 – **RPE 8**
 60 lb. dumbbell x 15 – **RPE 8**
 60 lb. dumbbell x 15 – **RPE 8**

5/ Abs | Decline leg raise

We would like to see 3 sets of 15 if possible. If this is not possible, just do what you can. If this is too easy, then do 3 sets of 15-20. **3 total work sets**

Goal – Progress weekly on these by adding 1 rep per set.

Rest Period – 1 minute between work sets

RPE 8-10

This is an example of what it could look like:

Week 1 – 3 x 10 (30 total reps)
 Week 2 – 3 x 11 (33 total reps)
 Week 3 – 3 x 12 (36 total reps)
 Week 4 – 3 x 13 (39 total reps)
 Week 5 – 3 x 14 (42 total reps)
 Week 6 – 3 x 15 (45 total reps)
 Week 7 – We will rotate out this exercise

6/ Calves | Standing calf raises

Do 4 heavy sets of 8 here. **This is one more set than you did last week.** On each set add in 10 slow partials out of the bottom. Work the stretch hard at the bottom. **4 total work sets**

Reminder – In between ALL sets of calves, you will be doing tibialis anterior work. Do sets of 25.

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

75 lbs. x 10 – Warm up
 125 x 5 – Feeder set
 185 x 8 then 10 partials – **RPE 11**
 185 x 8 then 10 partials – **RPE 11**
 185 x 8 then 10 partials – **RPE 11**
 185 x 8 then 10 partials – **RPE 11**

Day 2 – Upper body push focus

Chest	2 exercises	8 sets (6 of these are dynamic speed sets)
Shoulders	3 exercises	10 sets
Triceps	2 exercise	12 sets
7 exercises		30 sets

Warm up rotation

1. Hanging Leg Raises – 6-10 reps
2. Plank – 15 seconds
3. Band Pull Apart with long micro mini band – 15 reps

Do 3 rounds here.

1/ Chest | Dynamic benches

You will increase the percentage of your 1 rep max by 5% this week. This means using slightly heavier weight. Make sure to keep the rest periods at 120 sec. Do 6 sets of 5 here. The first 2 sets are with a grip one finger away from the smooth part of the bar. The next 2 sets are where your pinky will be on the ring. The last 2 sets your forefinger will be on the ring. Do 6 sets of 5 here. **6 total work sets**

For work sets use 75% of max weight.

Rest Period – 120 seconds between work sets

Work set % – 75%

This is an example of what it could look like:

135 x 10 – Warm up
 135 x 10 – Warm up
 185 x 4 – Feeder set
 235 for 6 x 5 – This assumes 235 is 75% of your 1 rep max.

2/ Chest | Slight decline dumbbell press

Do a few warm ups, then low rep feeder sets until you get to your big set. **Use 5 lbs. more than you used last week here.** Do about 8 reps there. We'll then do a 2nd all out set there where you try to match the number, and then drop the weight 30% and go to failure. **2 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

45's x 15 – Warm up
 65's x 4 – Feeder set
 95's x 8 – **RPE 9**
 95's x 8. Drop to 70's and go to failure – **RPE 12**

3/ Shoulders | High incline Smith press

We want a tough set of 8 then 5. **We are adding a rep to your sets of 3 from last week.** On your last 2 sets you will now do 4 reps with the same weight used last week. On all 4 work sets keep a slow and controlled tempo.

4 total work sets

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

95 x 3 – Feeder set

205 x 4 – Feeder set

135 x 8 (slow tempo) – **RPE 8** (Hold the first and last rep for a two count)

155 x 5 (slow tempo) – **RPE 9** (Hold the first and last rep for a two count)

175 x 4 (slow tempo) – **RPE 9** (Hold the first and last rep for a two count)

175 x 4 (slow tempo) – **RPE 9** (Hold the first and last rep for a two count)

4/ Shoulders | Dumbbell side laterals

These are just standard dumbbell side laterals. **Do 2 sets of 14 with what you did for 12 last week,** and then on your last set do a massive drop set. Do 14, drop the weight and shoot for another 12, then drop the weight and shoot for another 12. **3 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

30's x 14 – **RPE 9**

30's x 14 – **RPE 9**

30's x 14, then drop to 20's and do 12, then drop to 10's and do 12 – **RPE 12**

5/ Shoulders | Overhead plate raises

Raise the plate up to directly over your head. Do 3 sets of 13 here. **You are doing 1 more rep here this week with the same weight on each set. 3 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

25 lb. plate x 13 – **RPE 9**

25 lb. plate x 13 – **RPE 9**

25 lb. plate x 13 – **RPE 9**

6/ Triceps | Single arm triceps extensions

This is a great cable exercise for triceps. **Add 2 work sets this week.** Do 6 sets of 20 here. **6 total work sets**

Rest Period – 2 minutes between work sets

55 lbs. x 20 – **RPE 9**

55 lbs. x 20 – **RPE 9**

55 lbs. x 20 – **RPE 9**

55 lbs. x 20 – **RPE 9**

55 lbs. x 20 – **RPE 9**

55 lbs. x 20 – **RPE 9**

7/ Triceps | Tricep pushdowns with dual handles

Use two attachments. We prefer something with a spongy grip. Drive the weight straight down and flex your triceps hard. **Add 2 work sets this week. Do 6 hard sets of 10.**

6 total work sets

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

150 lbs. x 10 – **RPE 9**

150 lbs. x 10 – **RPE 9**

150 lbs. x 10 – **RPE 9**

150 lbs. x 10 – **RPE 9**

150 lbs. x 10 – **RPE 9**

150 lbs. x 10 – **RPE 9**

Day 3 – Upper body pull focus

Back	3 exercises	10 sets
Rear delts	1 exercise	4 sets
Biceps	2 exercises	12 sets
6 exercises		26 sets

1/ Back | Chest supported row

Do 3 sets of 12 here using the same weight that you used for 10 last week. Use a full range of motion really stretching out in the lengthened position. Even with a neutral grip you will feel your rhomboids stretching. **3 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

50 lbs. x 15 – Warm up
 50 lbs. x 10 – Warm up
 90 lbs. x 4 – Feeder set
 140 lbs. x 12 – **RPE 9**
 140 lbs. x 12 – **RPE 9**
 140 lbs. x 12 – **RPE 9**

2/ Back | Meadows row

Do two low rep feeder sets to get you to your working weight. **Start with two hard sets of 10 using 10 lbs more than last week.** Next up is your money set. Do around 10, where 10 is failure. If you do 9 or 11, that's ok, we just need that last rep to be failure with good form. If you get 12 or more, you didn't go heavy enough. After you do your 10, drop the weight 25-30% and grind out as many more reps as you can. Treat your arms as simple attachments, do not pull with your biceps. **3 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

50 x 5 – Feeder set
 75 x 5 – Feeder set
 120 x 10 – **RPE 10**
 120 x 10 – **RPE 10**
 120 x 10, then 95 x 10 – **RPE 12**

3/ Back | Stretch pulldowns

Add a set from last week and do 4 sets of 10 here using the same weight you used last week. You can pick either version. Whichever version you pick, stick with it throughout the block. **4 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

170 lbs. x 10 – **RPE 9**
 170 lbs. x 10 – **RPE 9**
 170 lbs. x 10 – **RPE 9**
 170 lbs. x 10 – **RPE 9**

4/ Rear delts | Machine rear delt flyes

Do 4 sets of 20 here using the weight you used last week.

This is an extra set this week. **4 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

115 lbs. x 20 – **RPE 9**

115 lbs. x 20 – **RPE 9**

115 lbs. x 20 – **RPE 9**

115 lbs. x 20 – **RPE 9**

5/ Biceps | Standing hammer dumbbell curls

You are going to do 1 warm up set first. **You are adding one more work sets this week.** Do 6 sets of 12 here. **6 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

20 lbs. x 15 – Warm up

30 lbs. x 12 – **RPE 12**

30 lbs. x 12 – **RPE 12**

30 lbs. x 12 – **RPE 12**

30 lbs. x 12 – **RPE 12**

30 lbs. x 12 – **RPE 12**

30 lbs. x 12 – **RPE 12**

6/ Biceps | Concentration preacher curls

You are adding one work sets this week. Do 6 working sets close to failure shooting for about 10 reps. Use slow and controlled form. **6 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

30's x 10 – **RPE 9**

30's x 10 – **RPE 9**

30's x 10 – **RPE 9**

30's x 10 – **RPE 9**

30's x 10 – **RPE 9**

30's x 10 – **RPE 9**

Day 4 – Lower body focus

Abs	1 exercise	3 sets
Legs	4 exercises	13 sets
Speed pulls	1 exercise	15 sets (these are all dynamic speed sets)
Spinal erectors	1 exercise	3 sets
Calves	1 exercise	4 sets
8 exercises		38 sets

Warm up rotation

1. Hanging Leg Raises – 6-10 reps
2. Plank – 15 seconds
3. Band Pull Apart with long micro mini band – 15 reps

Do 3 rounds here.

1/ Legs | Lying leg curls

Do 3-4 warm up sets and then do 4 hard sets of 10 reps. You are adding 2 reps with the same weight you did last week for 8. **4 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

50 x 15 – Warm up
 70 x 12 – Warm up
 90 x 6 – Feeder set
 130 x 10 – **RPE 9**
 130 x 10 – **RPE 9**
 130 x 10 – **RPE 9**
 130 x 10 – **RPE 9**

2/ Legs | Max effort front squats

Do 3 sets of 5 increasing weight as you go. See the example below though for the progression. **You are starting at what you did in your 2nd set last week again (3rd set during week 4), then going higher on your next two sets.** We will use the 2 seconds holds here as well. **3 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

135 x 10 – Warm up
 185 x 8 – Warm up
 225 x 3 – Feeder set
 275 x 5 – **RPE 7** (Hold the first and last rep for a two count at the top)
 285 x 5 – **RPE 8** (Hold the first and last rep for a two count at the top)
 295 x 5 – **RPE 9** (Hold the first and last rep for a two count at the top)

3/ Modified speed pulls (trap bar)

You are going to be using 65% of your 1 rep maximum deadlift this week as opposed to the 60% you used last week. 15 total work sets

For work sets use 65% of your 1 rep maximum deadlift

Rest Period – 10 seconds between work sets

Work set % – 65%

This is an example of what it could look like:

135 x 3 – Warm up

185 x 3 – Warm up

225 x 3 – Feeder set

295 for 15 x 1 – This assumes 295 is 65% of your 1 rep max.

4/ Spinal erectors | Zercher carry

On each set, make sure you take 28 total steps. **This is an extra 2 steps with each leg this week.** Do 3 sets.

3 total work sets

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

135 lbs. (barbell) x 28 steps – **RPE 7**

135 lbs. (barbell) x 28 steps – **RPE 7**

135 lbs. (barbell) x 28 steps – **RPE 7**

Or

110 lb. dumbbell x 24 steps – **RPE 7**

110 lb. dumbbell x 24 steps – **RPE 7**

110 lb. dumbbell x 24 steps – **RPE 7**

5/ Legs | Leg extensions

Do a couple feeder sets to find the right weight and then do 3 sets of 10 here. On the last set add on an additional 20 partials out of the bottom. **This is 5 more partials this week.** This will involve even more pain. Work through it.

3 total work sets

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

135 x 5 – Feeder set

155 x 3 – Feeder set

185 x 10 – **RPE 9**

185 x 10 – **RPE 9**

185 x 10, then 20 partials – **RPE 12**

6/ Legs | Dumbbell stiff legged deadlifts

Do these nice and slow with a small amount of extra weight. Do 3 slow sets of 6. 3 total work sets

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

135 x 3 – Feeder set

205 x 6 – **RPE 8**

205 x 6 – **RPE 8**

205 x 6 – **RPE 8**

7/ Calves | Seated calf raises

Do 4 sets of 15 here. **Use 10 more lbs. this week.** Work the stretch hard at the bottom. Don't forget to do your tibialis work in between sets. **4 total work sets**

Rest Period – 1 minute between work sets

This is an example of what it could look like:

75 lbs. x 10 – Warm up

125 x 5 – Feeder set

155 x 15 – **RPE 9-10**

155 x 15 – **RPE 9-10**

155 x 15 – **RPE 9-10**

155 x 15 – **RPE 9-10**

8/ Abs | Sit ups

We'd like to see 3 sets of 15 if possible. If this is not possible, just do what you can. If this is too easy, then do 3 sets of 15-20. **3 total work sets**

Goal – Progress weekly on these by adding 1 rep per set.

Rest Period – 1 minute between work sets

RPE 8-10

This is an example of what it could look like:

Week 1 – 3 x 10 (30 total reps)

Week 2 – 3 x 11 (33 total reps)

Week 3 – 3 x 12 (36 total reps)

Week 4 – 3 x 13 (39 total reps)

Week 5 – 3 x 14 (42 total reps)

Week 6 – 3 x 15 (45 total reps)

Week 7 – We will rotate out exercis

Day 5 – Upper body push focus

Chest	4 exercises	11 sets
Shoulders	2 exercises	6 sets
Triceps	2 exercises	14 sets
8 exercises		31 sets

Warm up rotation

1. Hanging Leg Raises – 6-10 reps
2. Plank – 15 seconds
3. Band Pull Apart with long micro mini band – 15 reps

Do 3 rounds here.

1/ Chest | Machine press

Use your favorite chest pressing machine here. You will do 2 hard sets of 8 to start. On your last set do another 8, and then drop the weight 25% and shoot for another 8 reps. See the example below. **Use 10 more lbs. on these this week.**

3 total work sets

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

75 lbs. x 10 – Warm up

105 lbs. x 10 – Warm up

135 x 5 – Feeder set

175 x 8 – **RPE 9**

175 x 8 – **RPE 9**

175 x 8, then 135 for another 8 – **RPE 12**

2/ Chest | Max effort floor presses with straight legs

Today is a maximal strength bench day. There continues to be a really heavy emphasis on shoulders and triceps here. You are going to work up to a set of 3 here with perfect form. You will then follow that up with 2 sets of 6 with 80% of your 1 rep maximum on the incline done with a very slow and controlled tempo. **This is 2 extra reps per set on the last two sets.** Lower with a 3 count. **3 total work sets**

Rest Period – 2 minutes between work set

Work set % – 80% on last 2 sets

This is an example of what it could look like:

135 x 10 – Warm up

135 x 10 – Warm up

185 x 4 – Feeder set

255 x 3 – **RPE 9**

235 x 6 (slow tempo) - Assumes 235 is 80% of your 1 rep max (Hold the first and last rep for a two count)

235 x 6 (slow tempo) - Assumes 235 is 80% of your 1 rep max (Hold the first and last rep for a two count)

3/ Chest | Pec minor dips

Do 3 sets to failure. **3 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

Bodyweight x F – **RPE 10**

Bodyweight x F – **RPE 10**

Bodyweight x F – **RPE 10**

4/ Chest | Slight decline dumbbell press

Do a few low rep feeder sets until you get to your big set. Do about 8 reps there. We'll then do a 2nd all out set there where you try to match the number, and then drop the weight 30% and go to failure again. **Go up 5 lbs. this week on the work sets. 2 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

45's x 4

65's x 4

95's x 8 – **RPE 9**

95's x 8. Drop to 70's and get 6 more – **RPE 12**

5/ Shoulders | Dumbbell medium side lateral partials/swings

Do 1 warm up set here before doing your medium heavy sets. Do 3 hard sets of 35 reps here. **No progression on this one, as the 35's will produce maximum pain. 3 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

20 lbs. x 10 – Warm up

35 lbs. x 35 – **RPE 9**

35 lbs. x 35 – **RPE 9**

35 lbs. x 35 – **RPE 9**

6/ Shoulders | Supine cable laterals

Do 3 sets of 19 here today. **Squeeze out 2 more reps with the same weight this week.** Do these with a nice slow tempo as well. **3 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

25 lbs. x 19 – **RPE 8-9**

25 lbs. x 19 – **RPE 8-9**

25 lbs. x 19 – **RPE 8-9**

7/ Triceps | Seated rope extensions

If you do not have a bench to support your back you can do these standing facing away from the cable station. Do 8 sets of 12 here reaching failure. **This is two extra sets. 8 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

125 lbs. x 12 – **RPE 9-10**

125 lbs. x 12 – **RPE 9-10**

125 lbs. x 12 – **RPE 9-10**

125 lbs. x 12 – **RPE 9-10**

125 lbs. x 12 – **RPE 9-10**

125 lbs. x 12 – **RPE 9-10**

125 lbs. x 12 – **RPE 9-10**

125 lbs. x 12 – **RPE 9-10**

8/ Triceps | Decline lying extensions

Do these lying on a slight decline. Do 6 sets of 8. **No progression here, as your arms will be destroyed. 6 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

85 x 8 – **RPE 9**

85 x 8 – **RPE 9**

85 x 8 – **RPE 9**

85 x 8 – **RPE 9**

85 x 8 – **RPE 9**

85 x 8 – **RPE 9**

DAYS 6 & 7

OFF - FAMILY DAY

Recover hard. Come back ready to move weight.

BLOCK 3 OF 3

WEEK 7

Execute the work. Track the loads. Recover hard.

WEEK 7

Day 1 – Lower body focus

Abs	1 exercise	3 sets
Legs	3 exercises	15 sets (9 of these are dynamic speed sets)
Low back	1 exercise	3 sets
Calves	1 exercise	3 sets
6 exercises		24 sets

Day 2 – Upper body push focus

Chest	2 exercises	11 sets (9 of these are dynamic speed sets)
Shoulders	3 exercises	10 sets
Triceps	2 exercises	8 sets
7 exercises		29 sets

Day 3 – Upper body pull focus

Back	3 exercises	9 sets
Rear delts	1 exercise	3 sets
Biceps	2 exercises	6 sets
6 exercises		18 sets

Day 4 – Lower body focus

Abs	1 exercise	3 sets
Legs	4 exercises	13 sets
Speed pulls	1 exercise	10 sets (these are all dynamic speed sets)
Spinal erectors	1 exercise	3 sets
Calves	1 exercise	4 sets
8 exercises		33 sets

Day 5 – Upper body push focus

Chest	4 exercises	11 sets
Shoulders	2 exercises	6 sets
Triceps	2 exercises	8 sets
8 exercises		25 sets

Days 6 & 7 - OFF - Family Days

Day 1 – Lower body focus

Abs	1 exercise	3 sets
Legs	3 exercises	15 sets (9 of these are dynamic speed sets)
Low back	1 exercise	3 sets
Calves	1 exercise	4 sets
6 exercises		24 sets

Warm up rotation

1. Hanging Leg Raises - 6-10 reps
2. Plank – 15 seconds
3. Band Pull Apart with long micro mini band – 15 reps

Do 3 rounds here.

1/ Legs | Seated leg curls

During this phase we are going to continue to go hard on leg curls. It will consist of straight sets. Do 3 tough sets of 8 here. Lower the weight with a 3 count. **3 total work sets**

Rest Period – 2 minutes between sets

This is an example of what it could look like:

50 x 15 – Warm up set
 70 x 12 – Warm up set
 90 x 6 – Feeder set
 130 x 8 – **RPE 9**
 130 x 8 – **RPE 9**
 130 x 8 – **RPE 9**

2/ Legs | Dynamic squats

You are going to be squatting to a box this week. Squat to parallel depth. Use 80% of your 1 rep max squat and do 9 sets of 3. This will get very hard as you go. Push hard and explode up. **9 total work sets**

For work sets use 80% of your 1 rep maximum squat.

Rest Period – 2 minutes between sets

Work set % – 80%

This is an example of what it could look like:

135 x 10 – Warm up
 185 x 8 – Warm up
 225 x 4 – Feeder set
 285 x 3 – Feeder
 305 for 9 x 3 - This assumes 350 is 80% of your 1 rep max.

3/ Legs | Split squats

I prefer to do these in a Smith machine with a slow tempo. Also, elevate your lead leg with a plate or aerobic step bench. Do 3 sets of 8 here. **3 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

No weight x 10 – Warm up set
 10 lbs. per side x 6 – Feeder set
 20 lbs. per side x 8 – **RPE 9**
 20 lbs. per side x 8 – **RPE 9**
 20 lbs. per side x 8 – **RPE 9**

4/ Low back | Banded good mornings

proper form for these. Most people use a 40-80 lb light band. Do 3 sets of 15. 3 total work sets

This is an example of what it could look like:

Bodyweight x 10 – Warm up

 40-80 lb light band x 15 · **RPE 7**

5/ Abs | Ab crunches

These are simple ab crunches. Do 3 sets to failure. **3 total work sets**

Goal – Progress weekly on these by adding 1 rep per set.

Rest Period – 1 minute between work sets

This is an example of what it could look like:

Bodyweight x Failure – **RPE 10**
 Bodyweight x Failure – **RPE 10**
 Bodyweight x Failure – **RPE 10**

6/ Calves | Standing calf raises

Do 3 heavy sets of 8 here. On each set add in 10 slow partials out of the bottom. Work the stretch hard at the bottom. **3 total work sets**

Reminder – In between ALL sets of calves, you will be doing tibialis anterior work. Do sets of 25.

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

75 lbs. x 10 – Warm up
 125 x 5 – Feeder set
 175 x 8 then 10 partials – **RPE 11**
 175 x 8 then 10 partials – **RPE 11**
 175 x 8 then 10 partials – **RPE 11**

Day 2 – Upper body push focus

Chest	2 exercises	11 sets (9 of these are dynamic speed sets)
Shoulders	3 exercises	10 sets
Triceps	2 exercise	8 sets
7 exercises		29 sets

Warm up rotation

1. Hanging Leg Raises – 6-10 reps
2. Plank – 15 seconds
3. Band Pull Apart with long micro mini band – 15 reps

Do 3 rounds here.

1/ Chest | Dynamic benches

Use 80% of your 1 rep max bench and do 9 sets of 3. Continue to do what we have been doing with your grip. The first 3 sets are with a grip one finger away from the smooth part of the bar. The next 3 sets are where your pinky will be on the ring. The last 3 sets your forefinger will be on the ring. Do 9 sets of 3 here. **9 total work sets**

For work sets use 80% of max weight.

Rest Period – 2 minutes between work sets

Work set % – 80%

This is an example of what it could look like:

135 x 10 – Warm up

135 x 10 – Warm up

185 x 4 – Feeder set

225 x 4 – Feeder set

280 for 9 x 3 – This assumes 280 is 80% of your 1 rep max.

2/ Chest | Flat dumbbell press

Do a few warm ups, then low rep feeder sets until you get to your big set. Do about 8 reps there. We'll then do a 2nd all out set there where you try to match the number, and then drop the weight 30% and go to failure. **2 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

45's x 15 – Warm up

65's x 4 – Feeder set

85's x 8 – **RPE 9**

85's x 8. Drop to 60's and go to failure – **RPE 12**

3/ Shoulders | High incline Smith press

We want a tough set of 8 then 5. Also, we are adding a heavy set of 2 here during this phase. On all 4 work sets keep a slow and controlled tempo. This allows you to go heavy and use lower reps, without getting injured. Lastly, before your first rep, and after you complete the last rep do your 2 second hold. **4 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

95 x 3 – Feeder set

205 x 4 – Feeder set

135 x 8 (slow tempo) – **RPE 8** (Hold the first and last rep for a two count)

155 x 5 (slow tempo) – **RPE 9** (Hold the first and last rep for a two count)

175 x 3 (slow tempo) – **RPE 9** (Hold the first and last rep for a two count)

185 x 2 (slow tempo) – **RPE 9** (Hold the first and last rep for a two count)

4/ Shoulders | Cable side laterals

These are the cable version of standard dumbbell side laterals. Do 3 sets of 20 here. This is going to burn.

3 total work sets

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

25 lbs. x 20 – **RPE 9**

25 lbs. x 20 – **RPE 9**

25 lbs. x 20 – **RPE 9**

5/ Shoulders | Incline front delt raise

Use controlled form and keep the front delts loaded. Do 3 sets of 15 here. **3 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

20 lbs. x 15 – **RPE 8**

20 lbs. x 15 – **RPE 8**

20 lbs. x 15 – **RPE 8**

6/ Triceps | Pronated kickbacks

Watch how my palms are facing up when I contract on these. This grip really forces the medial head of your triceps to work hard. Do 4 sets of 15 here. **4 total work sets**

Rest Period – 2 minutes between work sets

20 lbs. x 15 – **RPE 8**

20 lbs. x 15 – **RPE 8**

20 lbs. x 15 – **RPE 8**

20 lbs. x 15 – **RPE 8**

7/ Triceps | JM press

The pronated kickbacks were a perfect lead for these. You will continue to smash the medial head of your triceps here. Do a couple sets to get the feel of these and warm up the elbows. Do 4 hard sets of 8 here. 4 total work sets

This is an example of what it could look like:

Bar only x 8 – Warm up

Bar only x 6 – Warm up

75 lbs. x 8 – **RPE 9**

75 lbs. x 8 – **RPE 9**

75 lbs. x 8 – **RPE 9**

75 lbs. x 8 – **RPE 9**

Day 3 – Upper body pull focus

Back	3 exercises	9 sets
Rear delts	1 exercise	3 sets
Biceps	2 exercises	6 sets
6 exercises		18 sets

1/ Back | Dumbbell row

On these, keep your feet on the floor instead of kneeling on a bench. You do not have to straddle the bench; you can back up and lean on it. Do 3 sets of 8 here. Use a full range of motion and stretch hard in the lengthened position.
3 total work sets

This is an example of what it could look like:

30 lbs. x 15 – Warm up
50 lbs. x 10 – Warm up
70 lbs. x 4 – Feeder set
90 lbs. x 8 – **RPE 9**
90 lbs. x 8 – **RPE 9**
90 lbs. x 8 – **RPE 9**

2/ Back | Incline row

You can use dumbbells or kettlebells on these. Use the pronated (overhead) grip to target more rhomboids and lower traps. Do two low rep feeder sets to get you to your working weight. Do two hard sets of 10 to start. Next up is your money set. Do around 10, where 10 is failure. After you do your 10, drop the weight 30% and grind out as many more reps as you can. Treat your arms as simple attachments, do not pull with your biceps. **3 total work sets**

This is an example of what it could look like:

30 x 5 – Feeder set
45 x 5 – Feeder set
60 x 10 – **RPE 10**
60 x 10 – **RPE 10**
60 x 10, then 40 x 10 – **RPE 12**

Rest Period – 3 minutes between work sets

3/ Back | Dumbbell pullover

Do 3 sets of 10 here. I would prefer you do these band- ed as shown in the setup notes. 3 total work sets

50 lbs. + 5-35 lb mini band x 10 - RPE 9
50 lbs. + 5-35 lb mini band x 10 - RPE 9
50 lbs. + 5-35 lb mini band x 10 - RPE 9

4/ Rear delts | Machine rear delt flyes

Do 3 sets of 15 here. After each set add on 10 partials out of the stretch position. **3 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

115 lbs. x 15, then 10 partials – **RPE 12**

115 lbs. x 15, then 10 partials – **RPE 12**

115 lbs. x 15, then 10 partials – **RPE 12**

5/ Biceps | One arm cable curl

You are going to do 1 warm up set first. Do 3 sets of 10.

3 total work sets

Rest Period – 1 minute between work sets

This is an example of what it could look like:

20 lbs. x 8 – Warm up

30 lbs. x 10 – **RPE 9**

30 lbs. x 10 – **RPE 9**

30 lbs. x 10 – **RPE 9**

6/ Biceps | Pinwheel curls

Do 2 working sets close to failure shooting for about 10 reps. Do a 3rd set where you add in one drop. Use slow and controlled form. **3 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

30's x 10 – **RPE 9**

30's x 10 – **RPE 9**

30's x 10, then drop to 15's and do 10 – **RPE 12**

Day 4 – Lower body focus

Abs	1 exercise	3 sets
Legs	4 exercises	13 sets
Speed pulls	1 exercise	10 sets (these are all dynamic speed sets)
Spinal erectors	1 exercise	3 sets
Calves	1 exercise	4 sets
8 exercises		33 sets

Warm up rotation

1. Hanging Leg Raises – 6-10 reps
2. Plank – 15 seconds
3. Band Pull Apart with long micro mini band – 15 reps

Do 3 rounds here.

1/ Legs | Lying leg curls

Do 3-4 warm up sets and then do 4 hard sets of 8 reps. Try to lower the weight with a 3 count on all reps.

4 total work sets

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

50 x 15 – Warm up set
 70 x 12 – Warm up set
 90 x 6 – Feeder set
 130 x 8 – **RPE 9**
 130 x 8 – **RPE 9**
 130 x 8 – **RPE 9**
 130 x 8 – **RPE 9**

2/ Legs | Max effort front squats

Use a slightly closer stance on these this week. Work up to a heavy triple for your first set. Drop the weight 15% and do 2 sets of 5 for your next two sets. **3 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

135 x 10 – Warm up
 185 x 8 – Warm up
 225 x 3 – Feeder set
 335 x 3 – **RPE 9** (Hold the first and last rep for a two count)
 285 x 5 – **RPE 8** (Hold the first and last rep for a two count)
 285 x 5 – **RPE 8** (Hold the first and last rep for a two count)

3/ Speed pulls

Go back to your regular barbell speed pulls this week. You are going to be using 50% of your 1 rep maximum deadlift to do 5 singles. Then you are going to use 55% of your 1 rep max for 5 more singles. **10 total work sets**

For 5 sets use 50% of your 1 rep maximum deadlift for 5 singles

For 5 sets use 55% of your 1 rep maximum deadlift for 5 singles

Rest Period – 1 minute between work sets

Work set % – 50%, 55%

This is an example of what it could look like:

135 x 3 – Feeder set

185 x 3 – Feeder set

225 x 3 – Feeder set

270 for 5 x 1 – This assumes 270 is 50% of your 1 rep max

280 for 5 x 1 – This assumes 280 is 55% of your 1 rep max

4/ Spinal erectors | Farmers walk

Hold heavy dumbbells by your side and walk 50 yards. Keep your chest up and your back straight. Use wrist wraps to help you hold on to the dumbbells if your grip fails. Do 3 sets. **3 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

120 lb. dumbbell x 50 yards – **RPE 8**

120 lb. dumbbell x 50 yards – **RPE 8**

120 lb. dumbbell x 50 yards – **RPE 8**

5/ Legs | Leg extensions

Do a couple feeder sets to find the right weight and then do 3 sets of 25 here. Get ready for fire. **3 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

85 x 5 – Feeder set

105 x 5 – Feeder set

135 x 25 – **RPE 9**

135 x 25 – **RPE 9**

135 x 25 – **RPE 9**

6/ Legs | Dumbbell stiff legged deadlifts

Do these nice and slow. Do 3 slow sets of 6. **3 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

135 x 3 – Feeder set

195 x 6 – **RPE 8**

195 x 6 – **RPE 8**

195 x 6 – **RPE 8**

7/ Calves | Seated calf raises

Do 4 sets of 15 here. Work the stretch hard at the bottom.
Don't forget to do your tibialis work in between sets.

4 total work sets

Rest Period – 1 minute between work sets

This is an example of what it could look like:

75 lbs. x 10 – Warm up

125 x 5 – Feeder set

125 x 15 – **RPE 9-10**

125 x 15 – **RPE 9-10**

125 x 15 – **RPE 9-10**

125 x 15 – **RPE 9-10**

8/ Abs | V ups

Do 3 sets of 10-15. **3 total work sets**

Rest Period – 1 minute between work sets

RPE 7-10

This is an example of what it could look like:

Bodyweight x 10 – **RPE 7**

Bodyweight x 10 – **RPE 7**

Bodyweight x 10 – **RPE 7**

Day 5 – Upper body push focus

Chest	4 exercises	11 sets
Shoulders	2 exercises	6 sets
Triceps	2 exercises	14 sets
8 exercises		31 sets

Warm up rotation

1. Hanging Leg Raises – 6-10 reps
2. Plank – 15 seconds
3. Band Pull Apart with long micro mini band – 15 reps

Do 3 rounds here.

1/ Chest | Machine press

Use your favorite chest pressing machine here as you did in block 2. You will do 3 hard sets of 10. **3 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

75 lbs. x 10 – Warm up
 105 lbs. x 10 – Warm up
 135 x 5 – Feeder set
 155 x 10 – **RPE 9**
 155 x 10 – **RPE 9**
 155 x 10 – **RPE 9**

2/ Chest | Max effort close grip incline barbell press

Work up to a heavy triple for your first set. Drop the weight 15% and do 2 sets of 5 for your next two sets.

3 total work sets

Rest Period – 2 minutes between work set

This is an example of what it could look like:

135 x 10 – Warm up
 135 x 10 – Warm up
 185 x 4 – Feeder set
 255 x 3 – **RPE 9**
 215 x 5 (slow tempo) – **RPE 8**
 215 x 5 (slow tempo) – **RPE 8**

3/ Chest | Dips

Do 3 sets to failure. **3 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

Bodyweight x F – **RPE 10**

Bodyweight x F – **RPE 10**

Bodyweight x F – **RPE 10**

4/ Chest | Machine flyes

Do a few low rep feeder sets until you get to your big set. Do about 8 reps there. We'll then do a 2nd all out set there where you try to match the number, and then drop the weight 30% and go to failure again. **2 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

85 lbs. x 4 – Feeder set

105 lbs. x 4 – Feeder set

135 lbs. x 8 – **RPE 10**

135 lbs. x 8. Drop to 105 lbs. and get 6 more – **RPE 12**

5/ Shoulders | Dumbbell side laterals

Do 1 warm up set here before doing your medium heavy sets. Do 3 hard sets of 15 reps here. **3 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

20 lbs. x 10 – Warm up

30 lbs. x 15 – **RPE 9**

30 lbs. x 15 – **RPE 9**

30 lbs. x 15 – **RPE 9**

6/ Shoulders | Dumbbell Y raises

Raise the dumbbells to 10 and 2 o'clock. Do 3 sets of 12 here. **3 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

20's x 12 – **RPE 9**

20's x 12 – **RPE 9**

20's x 12 – **RPE 9**

7/ Triceps | Seated rope extensions

Let's keep these going this block. If you do not have a bench to support your back, you can do these standing facing away from cable station. Do 4 sets of 12 here reaching failure. **4 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

125 lbs. x 12 – **RPE 9-10**

125 lbs. x 12 – **RPE 9-10**

125 lbs. x 12 – **RPE 9-10**

125 lbs. x 12 – **RPE 9-10**

8/ Triceps | Incline lying extensions

Do 4 sets of 10. **4 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

85 x 10 – **RPE 9**

85 x 10 – **RPE 9**

85 x 10 – **RPE 9**

85 x 10 – **RPE 9**

DAYS 6 & 7

OFF - FAMILY DAY

Recover hard. Come back ready to move weight.

BLOCK 3 OF 3

WEEK 8

Execute the work. Track the loads. Recover hard.

WEEK 8

Day 1 – Lower body focus

Abs	1 exercise	3 sets
Legs	3 exercises	17 sets (9 of these are dynamic speed sets)
Low back	1 exercise	2 sets
Calves	1 exercise	4 sets
6 exercises		26 sets

Day 2 – Upper body push focus

Chest	2 exercises	11 sets (9 of these are dynamic speed sets)
Shoulders	3 exercises	11 sets
Triceps	2 exercises	8 sets
7 exercises		30 sets

Day 3 – Upper body pull focus

Back	3 exercises	11 sets
Rear delts	1 exercise	3 sets
Biceps	2 exercises	8 sets
6 exercises		22 sets

Day 4 – Lower body focus

Abs	1 exercise	3 sets
Legs	4 exercises	12 sets
Speed pulls	1 exercise	10 sets (these are all dynamic speed sets)
Spinal erectors	1 exercise	3 sets
Calves	1 exercise	4 sets
8 exercises		32 sets

Day 5 – Upper body push focus

Chest	4 exercises	12 sets
Shoulders	2 exercises	8 sets
Triceps	2 exercises	10 sets
8 exercises		30 sets

Days 6 & 7 - OFF - Family Days

Day 1 – Lower body focus

Abs	1 exercise	3 sets
Legs	3 exercises	17 sets (9 of these are dynamic speed sets)
Low back	1 exercise	2 sets
Calves	1 exercise	4 sets
6 exercises		26 sets

Warm up rotation

1. Hanging Leg Raises - 6-10 reps
2. Plank - 15 seconds
3. Band Pull Apart with long micro mini band - 15 reps

Do 3 rounds here.

1/ Legs | Seated leg curls

We are adding an extra set this week as our progression.

Do 4 tough sets of 8 here. Lower the weight with a 3 count.

4 total work sets

Rest Period – 2 minutes between sets

This is an example of what it could look like:

50 x 15 – Warm up set

70 x 12 – Warm up set

90 x 6 – Feeder set

130 x 8 – **RPE 9**

130 x 8 – **RPE 9**

130 x 8 – **RPE 9**

130 x 8 – **RPE 9**

2/ Legs | Dynamic squats

You are going to be squatting to a box again this week. Squat to parallel depth. This week we drop down to 55% for your 9 sets of three. Do not go heavier than this. This is done specifically to prepare you for next week. **9 total work sets**

For work sets use 55% of your 1 rep maximum squat.

Rest Period – 1 minute between sets

Work set % – 55%

This is an example of what it could look like:

135 x 10 – Warm up

185 x 8 – Warm up

225 x 4 – Feeder set

275 for 9 x 3 - This assumes 275 is 55% of your 1 rep max.

3/ Legs | Split squats

We add an extra set here this week for your progression.

Do 4 sets of 8 here. **4 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

No weight x 10 – Warm up set

10 lbs. per side x 6 – Feeder set

20 lbs. per side x 8 – **RPE 9**

20 lbs. per side x 8 – **RPE 9**

20 lbs. per side x 8 – **RPE 9**

20 lbs. per side x 8 – **RPE 9**

4/ Low back | Banded good mornings

Reduce your sets by one set this week. You will see why later this week. Do 2 sets of 15. **2 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

Bodyweight x 10 – Warm up

40-80 lb light band x 15 · **RPE 7**

5/ Abs | Ab crunches

Do 3 sets to failure. **3 total work sets**

Goal – Progress weekly on these by adding 1 rep per set.

Rest Period – 1 minute between work sets

This is an example of what it could look like:

Bodyweight x Failure – **RPE 10**

Bodyweight x Failure – **RPE 10**

Bodyweight x Failure – **RPE 10**

6/ Calves | Standing calf raises

We will add one set this week. Do 4 heavy sets of 8 here. On each set add in 10 slow partials out of the bottom. Work the stretch hard at the bottom. **4 total work sets**

Reminder – In between ALL sets of calves, you will be doing tibialis anterior work. Do sets of 25.

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

75 lbs. x 10 – Warm up

125 x 5 – Feeder set

175 x 8 then 10 partials – **RPE 11**

175 x 8 then 10 partials – **RPE 11**

175 x 8 then 10 partials – **RPE 11**

175 x 8 then 10 partials – **RPE 11**

Day 2 – Upper body push focus

Chest	2 exercises	11 sets (9 of these are dynamic speed sets)
Shoulders	3 exercises	11 sets
Triceps	2 exercise	8 sets
7 exercises		30 sets

Warm up rotation

1. Hanging Leg Raises – 6-10 reps
2. Plank – 15 seconds
3. Band Pull Apart with long micro mini band – 15 reps

Do 3 rounds here.

1/ Chest | Dynamic benches

Use 55% of your 1 rep max squat and do 9 sets of 3. We are dropping our % used here just like we did on the dynamic squats yesterday. Continue to do what we have been doing with your grip. Do 9 sets of 3 here. **9 total work sets**

For work sets use 55% of max weight.

Rest Period – 1 minute between work sets

Work set % – 55%

This is an example of what it could look like:

135 x 10 – Warm up
 135 x 10 – Warm up
 185 x 4 – Feeder set
 225 x 4 – Feeder set
 225 for 9 x 3 – This assumes 225 is 55% of your 1 rep max.

2/ Chest | Flat dumbbell press

Keep this the same as last week. Do a few warm ups, then low rep feeder sets until you get to your big set. Do about 8 reps there. We'll then do a 2nd all out set there where you try to match the number, and then drop the weight 30% and go to failure. **2 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

45's x 15 – Warm up
 65's x 4 – Feeder set
 85's x 8 – **RPE 9**
 85's x 8. Drop to 60's and go to failure – **RPE 12**

3/ Shoulders | High incline Smith press

We want a tough set of 8 then 5. Also, we are dropping the heavy set of 2 from this week. On the work sets keep a slow and controlled tempo. Lastly, before your first rep, and after you complete the last rep do your 2 second hold.

3 total work sets

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

95 x 3 – Feeder set

205 x 4 – Feeder set

135 x 8 (slow tempo) – **RPE 8** (Hold the first and last rep for a two count)

155 x 5 (slow tempo) – **RPE 9** (Hold the first and last rep for a two count)

175 x 3 (slow tempo) – **RPE 9** (Hold the first and last rep for a two count)

4/ Shoulders | Cable side laterals

We are adding one set here this week. Do 4 sets of 20 here. **4 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

25 lbs. x 20 – **RPE 9**

25 lbs. x 20 – **RPE 9**

25 lbs. x 20 – **RPE 9**

25 lbs. x 20 – **RPE 9**

5/ Shoulders | Incline front delt raise

We are adding one set here this week. Do 4 sets of 15 here. **4 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

20 lbs. x 15 – **RPE 8**

20 lbs. x 15 – **RPE 8**

20 lbs. x 15 – **RPE 8**

20 lbs. x 15 – **RPE 8**

6/ Triceps | Pronated kickbacks

We are keeping these the same as last week. Do 4 sets of 15 here. **4 total work sets**

Rest Period – 2 minutes between work sets

20 lbs. x 15 – **RPE 8**

20 lbs. x 15 – **RPE 8**

20 lbs. x 15 – **RPE 8**

20 lbs. x 15 – **RPE 8**

7/ Triceps | JM press

We are keeping these the same as last week. Do a couple sets to get the feel of these and to ensure the elbows are warmed up. Do 4 hard sets of 8 here. **4 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

Bar only x 8 – Warm up

Bar only x 6 – Warm up

75 lbs. x 8 – **RPE 9**

75 lbs. x 8 – **RPE 9**

75 lbs. x 8 – **RPE 9**

75 lbs. x 8 – **RPE 9**

Day 3 – Upper body pull focus

Back	3 exercises	11 sets
Rear delts	1 exercise	3 sets
Biceps	2 exercises	8 sets
6 exercises		22 sets

1/ Back | Dumbbell row

Add 2 reps on these to what you did last week. Do 3 sets of 10 this time. Use a full range of motion really stretching out in the lengthened position. **3 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

30 lbs. x 15 – Warm up
 50 lbs. x 10 – Warm up
 70 lbs. x 4 – Feeder set
 90 lbs. x 10 – **RPE 9**
 90 lbs. x 10 – **RPE 9**
 90 lbs. x 10 – **RPE 9**

2/ Back | Incline row

Do two low rep feeder sets to get you to your working weight. **We are adding a working set this week.** Do three hard sets of 10 to start. Next up is your money set. Do around 10, where 10 is failure. After you do your 10, drop the weight 30% and grind out as many more reps as you can. Treat your arms as simple attachments, do not pull with your biceps. **3 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

30 x 5 – Feeder set
 45 x 5 – Feeder set
 60 x 10 – **RPE 10**
 60 x 10 – **RPE 10**
 60 x 10 – **RPE 10**
 60 x 10, then 40 x 10 – **RPE 12**

3/ Back | Dumbbell pullover

Do 4 sets of 10 here. **This is an additional set this week. 4 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

50 lbs. + 5-35 lb mini band x 10 · **RPE 9**

4/ Rear delts | Machine rear delt flyes

Keep these the same this week. Do 3 sets of 15 here. After each set add on 10 partials out of the stretch position.

3 total work sets

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

115 lbs. x 15, then 10 partials – **RPE 12**

115 lbs. x 15, then 10 partials – **RPE 12**

115 lbs. x 15, then 10 partials – **RPE 12**

5/ Biceps | One arm cable curl

You are going to do 1 warm up set first. **We are adding an extra set this week.** Do 4 sets of 10. **4 total work sets**

Rest Period – 1 minute between work sets

This is an example of what it could look like:

20 lbs. x 8 – Warm up

30 lbs. x 10 – **RPE 9**

30 lbs. x 10 – **RPE 9**

30 lbs. x 10 – **RPE 9**

30 lbs. x 10 – **RPE 9**

6/ Biceps | Pinwheel curls

We are adding a set here this week. Do 3 working sets close to failure shooting for about 10 reps. Do a 4thrd set where you add in one drop. Use slow and controlled form. **4 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

30's x 10 – **RPE 9**

30's x 10 – **RPE 9**

30's x 10 – **RPE 9**

30's x 10, then drop to 15's and do 10 – **RPE 12**

Day 4 – Lower body focus

Abs	1 exercise	3 sets
Legs	4 exercises	12 sets
Speed pulls	1 exercise	10 sets (these are all dynamic speed sets)
Spinal erectors	1 exercise	3 sets
Calves	1 exercise	4 sets
8 exercises		32 sets

Warm up rotation

1. Hanging Leg Raises – 6-10 reps
2. Plank – 15 seconds
3. Band Pull Apart with long micro mini band – 15 reps

Do 3 rounds here.

1/ Legs | Lying leg curls

Keep these the same this week. Do 3-4 warm up sets and then do 4 hard sets of 8 reps. Try to lower the weight with a 3 count on all reps. **4 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

50 x 15 – Warm up set
 70 x 12 – Warm up set
 90 x 6 – Feeder set
 130 x 8 – **RPE 9**
 130 x 8 – **RPE 9**
 130 x 8 – **RPE 9**
 130 x 8 – **RPE 9**

2/ Legs | Barbell good mornings

We are replacing your max effort work here this week. Use 30% of your 1 rep squat max. Use a nice slow controlled tempo with a focus on hamstrings. Do 3 sets of 5.

3 total work sets

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

Bar x 10 – Warm up
 95 x 10 – Warm up
 140 x 5 – **RPE 7**
 140 x 5 – **RPE 7**
 140 x 5 – **RPE 7**

3/ Speed pulls

You are going to be using 60% of your 1 rep maximum deadlift to do 5 singles. Next you are going to use 65% of your 1 rep max for 5 more singles. **10 total work sets**

For 5 sets use 60% of your 1 rep maximum deadlift for 5 singles

For 5 sets use 65% of your 1 rep maximum deadlift for 5 singles

Rest Period – 1 minute between work sets

Work set % – 60%, 65%

This is an example of what it could look like:

135 x 3 – Feeder set

185 x 3 – Feeder set

225 x 3 – Feeder set

290 for 5 x 1 – This assumes 290 is 60% of your 1 rep max

310 for 5 x 1 – This assumes 305 is 65% of your 1 rep max

4/ Spinal erectors | Farmers walk

Hold heavier dumbbells than you did last week. 5 to 10 lbs. should do it. Hold your chest up and your back straight. Use wrist wraps to help you hold on to the dumbbells if your grip fails. Do 3 sets. **3 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

120 lb. dumbbell x 50 yards – **RPE 8**

120 lb. dumbbell x 50 yards – **RPE 8**

120 lb. dumbbell x 50 yards – **RPE 8**

5/ Legs | Leg extensions

Back the reps and intensity down on these this week. Do a couple feeder sets to find the right weight and then do 3 sets of 10 here. **3 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

85 x 5 – Feeder set

105 x 5 – Feeder set

150 x 10 – **RPE 8**

150 x 10 – **RPE 8**

150 x 10 – **RPE 8**

6/ Legs | Dumbbell stiff legged deadlifts

Keep these the same as last week and only do 2 sets as these are similar to the good mornings. Do these nice and slow. Do 2 slow sets of 6. **2 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

135 x 3 – Feeder set

195 x 6 – **RPE 8**

195 x 6 – **RPE 8**

7/ Calves | Seated calf raises

Keep these the same as last week. Do 4 sets of 15 here.
Work the stretch hard at the bottom. **4 total work sets**

Rest Period – 1 minute between work sets

This is an example of what it could look like:

75 lbs. x 10 – Warm up

125 x 5 – Feeder set

125 x 15 – **RPE 9-10**

125 x 15 – **RPE 9-10**

125 x 15 – **RPE 9-10**

125 x 15 – **RPE 9-10**

8/ Abs | V ups

Do 3 sets of 10-15. **3 total work sets**

Rest Period – 1 minute between work sets

RPE 7-10

This is an example of what it could look like:

Bodyweight x 10 – **RPE 7**

Bodyweight x 10 – **RPE 7**

Bodyweight x 10 – **RPE 7**

Day 5 – Upper body push focus

Chest	4 exercises	12 sets
Shoulders	2 exercises	8 sets
Triceps	2 exercises	10 sets
8 exercises		30 sets

Warm up rotation

1. Hanging Leg Raises – 6-10 reps
2. Plank – 15 seconds
3. Band Pull Apart with long micro mini band – 15 reps

Do 3 rounds here.

1/ Chest | Machine press

Keep these the same this week. You will do 3 hard sets of 10.
3 total work sets

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

75 lbs. x 10 – Warm up
105 lbs. x 10 – Warm up
135 x 5 – Feeder set
155 x 10 – **RPE 9**
155 x 10 – **RPE 9**
155 x 10 – **RPE 9**

2/ Chest | Max effort floor press with legs straight

Work up to a heavy single for your first set. Drop the weight 20% and do 2 sets of 3 for your next two sets.

3 total work sets

Rest Period – 2 minutes between work set

This is an example of what it could look like:

135 x 10 – Warm up
135 x 10 – Warm up
185 x 4 – Feeder set
285 x 1 – **RPE 9**
235 x 3 (slow tempo) – **RPE 8**
235 x 3 (slow tempo) – **RPE 8**

3/ Chest | Dips

Add a work set on these this week. Do 4 sets to failure.
4 total work sets

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

Bodyweight x F – **RPE 10**

Bodyweight x F – **RPE 10**

Bodyweight x F – **RPE 10**

Bodyweight x F – **RPE 10**

4/ Chest | Machine flyes

Keep these the same this week. Do a few low rep feeder sets until you get to your big set. Do about 8 reps there. We'll then do a 2nd all out set there where you try to match the number, and then drop the weight 30% and go to failure again. *2 total work sets*

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

85 lbs. x 4 – Feeder set

105 lbs. x 4 – Feeder set

135 lbs. x 8 – **RPE 10**

135 lbs. x 8. Drop to 105 lbs. and get 6 more – **RPE 12**

5/ Shoulders | Dumbbell side laterals

Do 1 warm up set here before doing your work sets. **Add a work set this week.** Do 4 hard sets of 15 reps here.
4 total work sets

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

20 lbs. x 10 – Warm up

30 lbs. x 15 – **RPE 9**

30 lbs. x 15 – **RPE 9**

30 lbs. x 15 – **RPE 9**

30 lbs. x 15 – **RPE 9**

6/ Shoulders | Dumbbell Y raises

Add a work set on these this week. Do 4 sets of 12 here.
4 total work sets

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

20's x 12 – **RPE 9**

20's x 12 – **RPE 9**

20's x 12 – **RPE 9**

20's x 12 – **RPE 9**

7/ Triceps | Seated rope extensions

Add a work set on these this week. Do 5 sets of 12 here reaching failure. *5 total work sets*

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

125 lbs. x 12 – **RPE 9-10**

125 lbs. x 12 – **RPE 9-10**

125 lbs. x 12 – **RPE 9-10**

125 lbs. x 12 – **RPE 9-10**

125 lbs. x 12 – **RPE 9-10**

8/ Triceps | Incline lying extensions

Add a work set on these this week. Do 5 sets of 10. *5 total work sets*

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

85 x 10 – **RPE 9**

85 x 10 – **RPE 9**

85 x 10 – **RPE 9**

85 x 10 – **RPE 9**

85 x 10 – **RPE 9**

DAYS 6 & 7

OFF - FAMILY DAY

Recover hard. Come back ready to move weight.

BLOCK 3 OF 3

WEEK 9

Execute the work. Track the loads. Recover hard.

WEEK 9

Day 1 – Lower body focus

Abs	1 exercise	3 sets
Legs	3 exercises	10 sets
Low back	1 exercise	2 sets
Calves	1 exercise	4 sets
6 exercises		19 sets

Day 2 – Upper body push focus

Chest	2 exercises	5 sets
Shoulders	3 exercises	12 sets
Triceps	2 exercises	10 sets
7 exercises		27 sets

Day 3 – Upper body pull focus

Back	3 exercises	13 sets
Rear delts	1 exercise	4 sets
Biceps	2 exercises	10 sets
6 exercises		27 sets

Day 4 – Lower body focus

Abs	1 exercise	3 sets
Legs	4 exercises	12 sets
Speed pulls	1 exercise	10 sets (these are all dynamic speed sets)
Spinal erectors	1 exercise	3 sets
Calves	1 exercise	4 sets
8 exercises		32 sets

Day 5 – Upper body push focus

Chest	4 exercises	13 sets
Shoulders	2 exercises	10 sets
Triceps	2 exercises	10 sets
8 exercises		33 sets

Days 6 & 7 - OFF - Family Days

Day 1 – Lower body focus

Abs	1 exercise	3 sets
Legs	3 exercises	10 sets
Low back	1 exercise	2 sets
Calves	1 exercise	4 sets
6 exercises		19 sets

Warm up rotation

1. Hanging Leg Raises - 6-10 reps
2. Plank – 15 seconds
3. Band Pull Apart with long micro mini band – 15 reps

Do 3 rounds here.

1/ Legs | Seated leg curls

Do 4 tough sets of 8 here again this week. Lower the weight with a 3 count. **4 total work sets**

Rest Period – 2 minutes between sets

This is an example of what it could look like:

50 x 15 – Warm up set
 70 x 12 – Warm up set
 90 x 6 – Feeder set
 130 x 8 – **RPE 9**
 130 x 8 – **RPE 9**
 130 x 8 – **RPE 9**
 130 x 8 – **RPE 9**

2/ Legs | Max effort squats

Ok let's see what you got! Today you are working up to 85% of your 1 rep max and doing 2 reps. Next you are going to do 90% for 2. Lastly you do 95% for 2. **3 total work sets**

For work sets use 85, 90, and 95% of your 1 rep maximum squat.

Rest Period – 3 minutes between sets

Work set % – 85%, 90%, 95%

This is an example of what it could look like:

135 x 10 – Warm up
 185 x 8 – Warm up
 225 x 4 – Feeder set
 315 x 3 – Feeder set
 375 x 2 – Feeder set
 425 x 2 – This assumes 425 is 85% of your 1 rep max.
 450 x 2 – This assumes 450 is 90% of your 1 rep max.
 475 x 2 – This assumes 475 is 95% of your 1 rep max

3/ Legs | Split squats

We reduce the sets intensity here this week to prepare you for next the leg workout. Do 3 sets of 8 here.

3 total work sets

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

No weight x 10 – Warm up set
10 lbs. per side x 6 – Feeder set
10 lbs. per side x 8 – **RPE 7**
10 lbs. per side x 8 – **RPE 7**
10 lbs. per side x 8 – **RPE 7**

4/ Low back | Banded good mornings

Keep this the same this week. Do 2 sets of 15.

2 total work sets

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

Bodyweight x 10 – Warm up
40-80 lb light band x 15 · **RPE 7**

5/ Abs | Ab crunches

Do 3 sets to failure. **3 total work sets**

Goal – Progress weekly on these by adding 1 rep per set.

Rest Period – 1 minute between work sets

This is an example of what it could look like:

Bodyweight x Failure – **RPE 10**
Bodyweight x Failure – **RPE 10**
Bodyweight x Failure – **RPE 10**

6/ Calves | Standing calf raises

Do 4 heavy sets of 8 here. On each set add in 10 slow partials out of the bottom. Work the stretch hard at the bottom. **4 total work sets**

Reminder – In between ALL sets of calves, you will be doing tibialis anterior work. Do sets of 25.

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

75 lbs. x 10 – Warm up
125 x 5 – Feeder set
175 x 8 then 10 partials – **RPE 11**
175 x 8 then 10 partials – **RPE 11**
175 x 8 then 10 partials – **RPE 11**
175 x 8 then 10 partials – **RPE 11**

Day 2 – Upper body push focus

Chest	2 exercises	5 sets
Shoulders	3 exercises	12 sets
Triceps	2 exercise	10 sets
7 exercises		27 sets

Warm up rotation

1. Hanging Leg Raises – 6-10 reps
2. Plank – 15 seconds
3. Band Pull Apart with long micro mini band – 15 reps

Do 3 rounds here.

1/ Chest | Flat dumbbell press

We will be going heavy on our benches this week, so the smart thing is to do these first. Keep this the same as last week. Do a few warm ups, then low rep feeder sets until you get to your big set. Do about 8 reps there. We'll then do a 2nd all out set there where you try to match the number, and then drop the weight 30% and go to failure.

2 total work sets

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

45's x 15 – Warm up

65's x 4 – Feeder set

85's x 8 – **RPE 9**

85's x 8. Drop to 60's and go to failure – **RPE 12**

2/ Chest | Max effort close grip benches

We are using the same rep pattern we used with our squats here. You do 85% for 2, then 90% for 2, then 95% for 2. Use a close grip on these. We don't want flared out elbows.

3 total work sets

For work sets use 85, 90, and 95% of max weight.

Rest Period – 1 minute between work sets

Rest Period – 85%, 90%, 95%

This is an example of what it could look like:

135 x 10 – Warm up

135 x 10 – Warm up

185 x 4 – Feeder set

240 x 2 – This assumes 240 is 85% of your 1 rep max

255 x 2 – This assumes 255 is 90% of your 1 rep max

270 x 2 – This assumes 270 is 95% of your 1 rep max

3/ Shoulders | High incline Smith press

We are bumping the reps here this week, but keep the holds in. **3 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

95 x 3 – Feeder set

205 x 4 – Feeder set

125 x 10 (slow tempo) – **RPE 8** (Hold the first and last rep for a two count)

125 x 10 (slow tempo) – **RPE 8** (Hold the first and last rep for a two count)

125 x 10 (slow tempo) – **RPE 8** (Hold the first and last rep for a two count)

4/ Shoulders | Cable side laterals

We are adding one set here this week. Do 5 sets of 20 here. **5 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

25 lbs. x 20 – **RPE 9**

25 lbs. x 20 – **RPE 9**

25 lbs. x 20 – **RPE 9**

25 lbs. x 20 – **RPE 9**

25 lbs. x 20 – **RPE 9**

5/ Shoulders | Incline front delt raise

Keep these the same this week. Do 4 sets of 15 here. **4 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

20 lbs. x 15 – **RPE 8**

20 lbs. x 15 – **RPE 8**

20 lbs. x 15 – **RPE 8**

20 lbs. x 15 – **RPE 8**

6/ Triceps | Pronated kickbacks

We are adding one set here this week. Do 5 sets of 15 here. **5 total work sets**

Rest Period – 2 minutes between work sets

20 lbs. x 15 – **RPE 8**

20 lbs. x 15 – **RPE 8**

20 lbs. x 15 – **RPE 8**

20 lbs. x 15 – **RPE 8**

20 lbs. x 15 – **RPE 8**

7/ Triceps | JM press

We are adding one set here this week. Do 5 hard sets of 8 here. *5 total work sets*

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

Bar only x 8 – Warm up

Bar only x 6 – Warm up

75 lbs. x 8 – **RPE 9**

75 lbs. x 8 – **RPE 9**

75 lbs. x 8 – **RPE 9**

75 lbs. x 8 – **RPE 9**

75 lbs. x 8 – **RPE 9**

Day 3 – Upper body pull focus

Back	3 exercises	13 sets
Rear delts	1 exercise	4 sets
Biceps	2 exercises	10 sets
6 exercises		27 sets

1/ Back | Dumbbell row

We are adding one set on these this week. Do 4 sets of 10 this time. Use a full range of motion really stretching out in the lengthened position. **4 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

30 lbs. x 15 – Warm up
 50 lbs. x 10 – Warm up
 70 lbs. x 4 – Feeder set
 90 lbs. x 10 – **RPE 9**
 90 lbs. x 10 – **RPE 9**
 90 lbs. x 10 – **RPE 9**
 90 lbs. x 10 – **RPE 9**

2/ Back | Incline row

Do two low rep feeder sets to get you to your working weight. **We are adding another working set this week.** Do four hard sets of 10 to start. Next up is your money set. Do around 10, where 10 is failure. After you do your 10, drop the weight 30% and grind out as many more reps as you can. Treat your arms as simple attachments, do not pull with your biceps. **5 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

30 x 5 – Feeder set
 45 x 5 – Feeder set
 60 x 10 – **RPE 10**
 60 x 10 – **RPE 10**
 60 x 10 – **RPE 10**
 60 x 10 – **RPE 10**
 60 x 10, then 40 x 10 – **RPE 12**

3/ Back | Dumbbell pullover

Do 4 sets of 10 here. This is the same as last week. **4 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

50 lbs. + 5-35 lb mini band x 10 · **RPE 9**

4/ Rear delts | Machine rear delt flyes

We are adding a work set here this week. Do 4 sets of 15 here. After each set add on 10 partials out of the stretch position. **4 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

115 lbs. x 15, then 10 partials – **RPE 12**

115 lbs. x 15, then 10 partials – **RPE 12**

115 lbs. x 15, then 10 partials – **RPE 12**

115 lbs. x 15, then 10 partials – **RPE 12**

5/ Biceps | One arm cable curl

You are going to do 1 warm up set first. **We are adding another set this week.** Do 5 sets of 10. **5 total work sets**

Rest Period – 1 minute between work sets

This is an example of what it could look like:

20 lbs. x 8 – Warm up

30 lbs. x 10 – **RPE 9**

30 lbs. x 10 – **RPE 9**

30 lbs. x 10 – **RPE 9**

30 lbs. x 10 – **RPE 9**

30 lbs. x 10 – **RPE 9**

6/ Biceps | Pinwheel curls

We are adding a set here this week. Do 4 working sets close to failure shooting for about 10 reps. Do a 5th set where you add in one drop. Use slow and controlled form. **5 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

30's x 10 – **RPE 9**

30's x 10 – **RPE 9**

30's x 10 – **RPE 9**

30's x 10 – **RPE 9**

30's x 10, then drop to 15's and do 10 – **RPE 12**

Day 4 – Lower body focus

Abs	1 exercise	3 sets
Legs	4 exercises	12 sets
Speed pulls	1 exercise	10 sets (these are all dynamic speed sets)
Spinal erectors	1 exercise	3 sets
Calves	1 exercise	4 sets
8 exercises		32 sets

Warm up rotation

1. Hanging Leg Raises – 6-10 reps
2. Plank – 15 seconds
3. Band Pull Apart with long micro mini band – 15 reps

Do 3 rounds here.

1/ Legs | Lying leg curls

Keep these the same this week. We are getting ready to go hard again on the squats. Do 3-4 warm up sets and then do 4 hard sets of 8 reps. Try to lower the weight with a 3 count on all reps. **4 total work sets**

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

50 x 15 – Warm up set
 70 x 12 – Warm up set
 90 x 6 – Feeder set
 130 x 8 – **RPE 9**
 130 x 8 – **RPE 9**
 130 x 8 – **RPE 9**
 130 x 8 – **RPE 9**

2/ Legs | Max effort squats

You are working up to a heavy single here. You are going to use a narrow squat stance for these. After that back the weight down by 20% and do 2 sets of 3.

3 total work sets

Rest Period – 3 minutes between work sets

This is an example of what it could look like:

135 x 10 – Warm up
 185 x 10 – Warm up
 225 x 3 – Feeder set
 275 x 2 – Feeder set
 315 x 2 Feeder set
365 x 1 – RPE 9-10
 295 x 3 – This assumes 295 is 80% of your 1 rep max
 295 x 3 – This assumes 295 is 80% of your 1 rep max

3/ Speed pulls

You are going to be using 70% of your 1 rep maximum deadlift to do 5 singles. Next you are going to use 75% of your 1 rep max for 5 more singles. **10 total work sets**

For 5 sets use 70% of your 1 rep maximum deadlift for 5 singles

For 5 sets use 75% of your 1 rep maximum deadlift for 5 singles

Rest Period – 1 minute between work sets

Work set % – 70%, 75%

This is an example of what it could look like:

135 x 3 – Feeder set

185 x 3 – Feeder set

225 x 3 – Feeder set

320 for 5 x 1 – This assumes 320 is 70% of your 1 rep max

350 for 5 x 1 – This assumes 350 is 75% of your 1 rep max

4/ Spinal erectors | Farmers walk

Hold even heavier dumbbells than you did last week. 5 to 10 lbs. should do it. Hold your chest up and your back straight. Use wrist wraps to help you hold on to the dumbbells if your grip fails. Do 3 sets. **3 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

135 lb. dumbbell x 50 yards – **RPE 8**

135 lb. dumbbell x 50 yards – **RPE 8**

135 lb. dumbbell x 50 yards – **RPE 8**

5/ Legs | Leg extensions

Back the reps and intensity down on these this week. Do a couple feeder sets to find the right weight and then do 3 sets of 10 here. Add a 2 second pause at the top on every rep. **3 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

85 x 5 – Feeder set

105 x 5 – Feeder set

140 x 10 – **RPE 9**

140 x 10 – **RPE 9**

140 x 10 – **RPE 9**

6/ Legs | Dumbbell stiff legged deadlifts

Do 2 slow sets of 6. **2 total work sets**

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

135 x 3 – Feeder set

195 x 6 – **RPE 8**

195 x 6 – **RPE 8**

7/ Calves | Seated calf raises

Keep these the same as last week. Do 4 sets of 15 here.
Work the stretch hard at the bottom. **4 total work sets**

Rest Period – 1 minute between work sets

This is an example of what it could look like:

75 lbs. x 10 – Warm up

125 x 5 – Feeder set

125 x 15 – **RPE 9-10**

125 x 15 – **RPE 9-10**

125 x 15 – **RPE 9-10**

125 x 15 – **RPE 9-10**

8/ Abs | V ups

Do 3 sets of 10-15. **3 total work sets**

Rest Period – 1 minute between work sets

RPE 7-10

This is an example of what it could look like:

Bodyweight x 10 – **RPE 7**

Bodyweight x 10 – **RPE 7**

Bodyweight x 10 – **RPE 7**

Day 5 – Upper body push focus

Chest	4 exercises	13 sets
Shoulders	2 exercises	10 sets
Triceps	2 exercises	10 sets
8 exercises		33 sets

Warm up rotation

1. Hanging Leg Raises – 6-10 reps
2. Plank – 15 seconds
3. Band Pull Apart with long micro mini band – 15 reps

Do 3 rounds here.

1/ Chest | Machine press

Keep these the same this week. You will do 3 hard sets of 10.
3 total work sets

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

75 lbs. x 10 – Warm up
105 lbs. x 10 – Warm up
135 x 5 – Feeder set
155 x 10 – **RPE 9**
155 x 10 – **RPE 9**
155 x 10 – **RPE 9**

2/ Chest | Max effort close grip incline press

Work up to a heavy single for your first set. Drop the weight 20% and do 2 sets of 3 for your next two sets.

3 total work sets

Rest Period – 2 minutes between work set

This is an example of what it could look like:

135 x 10 – Warm up
135 x 10 – Warm up
185 x 3 – Feeder set
255 x 1 – **RPE 9**
205 x 3 (slow tempo) – This assumes 205 is 80% of your 1 rep max
205 x 3 (slow tempo) – This assumes 205 is 80% of your 1 rep max

3/ Chest | Dips

Add a work set on these this week. Do 5 sets to failure.
5 total work sets

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

Bodyweight x F – **RPE 10**

Bodyweight x F – **RPE 10**

Bodyweight x F – **RPE 10**

Bodyweight x F – **RPE 10**

Bodyweight x F – **RPE 10**

4/ Chest | Machine flyes

Keep these the same this week. Do a few low rep feeder sets until you get to your big set. Do about 8 reps there. We'll then do a 2nd all out set there where you try to match the number, and then drop the weight 30% and go to failure again. *2 total work sets*

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

85 lbs. x 4 – Feeder set

105 lbs. x 4 – Feeder set

135 lbs. x 8 – **RPE 10**

135 lbs. x 8. Drop to 105 lbs. and get 6 more – **RPE 12**

5/ Shoulders | Dumbbell side laterals

Do 1 warm up set here before doing your work sets. Add a work set this week. Do 5 hard sets of 15 reps here.

5 total work sets

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

20 lbs. x 10 – Warm up

30 lbs. x 15 – **RPE 9**

30 lbs. x 15 – **RPE 9**

30 lbs. x 15 – **RPE 9**

30 lbs. x 15 – **RPE 9**

30 lbs. x 15 – **RPE 9**

6/ Shoulders | Dumbbell Y raises

Add a work set on these this week. Do 5 sets of 12 here.
5 total work sets

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

20's x 12 – **RPE 9**

20's x 12 – **RPE 9**

20's x 12 – **RPE 9**

20's x 12 – **RPE 9**

20's x 12 – **RPE 9**

7/ Triceps | Seated rope extensions

Add a work set on these this week. Do 5 sets of 12 here reaching failure. *5 total work sets*

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

125 lbs. x 12 – **RPE 9-10**

125 lbs. x 12 – **RPE 9-10**

125 lbs. x 12 – **RPE 9-10**

125 lbs. x 12 – **RPE 9-10**

125 lbs. x 12 – **RPE 9-10**

8/ Triceps | Incline lying extensions

Keep these the same this week. Do 5 sets of 10. *5 total work sets*

Rest Period – 2 minutes between work sets

This is an example of what it could look like:

85 x 10 – **RPE 9**

85 x 10 – **RPE 9**

85 x 10 – **RPE 9**

85 x 10 – **RPE 9**

85 x 10 – **RPE 9**

DAYS 6 & 7

OFF - FAMILY DAY

Recover hard. Come back ready to move weight.

CM STRENGTH

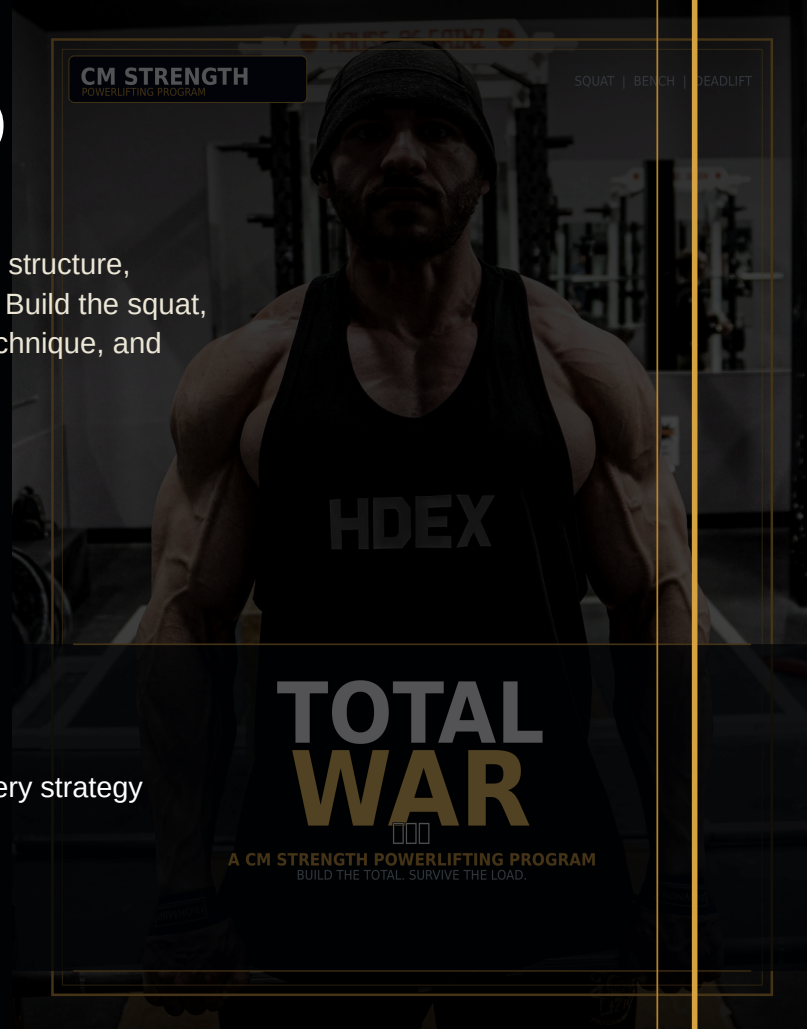

POWERLIFTING COACHING

TRAINER PROFILE

CHILI MADRID

Powerlifting coaching for lifters who want clear structure, stronger execution, and measurable progress. Build the squat, bench, and deadlift while keeping recovery, technique, and long-term consistency in the plan.

- Custom strength programming
- Technique review and exercise selection
- Meet prep, hypertrophy blocks, and recovery strategy
